

GREEN CLIMATE FUND

Green Climate Fund Strategic pipeline development in land use sector

Training session
How to access Green Climate Fund financing for
land-based projects?

September 2017

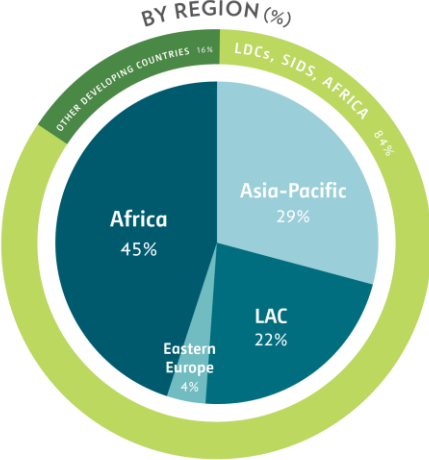

GREEN CLIMATE FUND

GCF Portfolio

43 projects/programmes with USD 2.2 billion of GCF funding

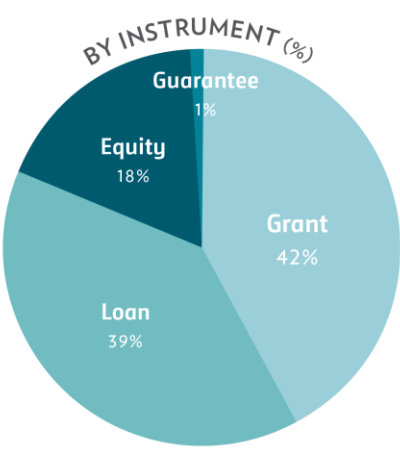

Committed GCF funding by region & instrument

BY REGION (%)

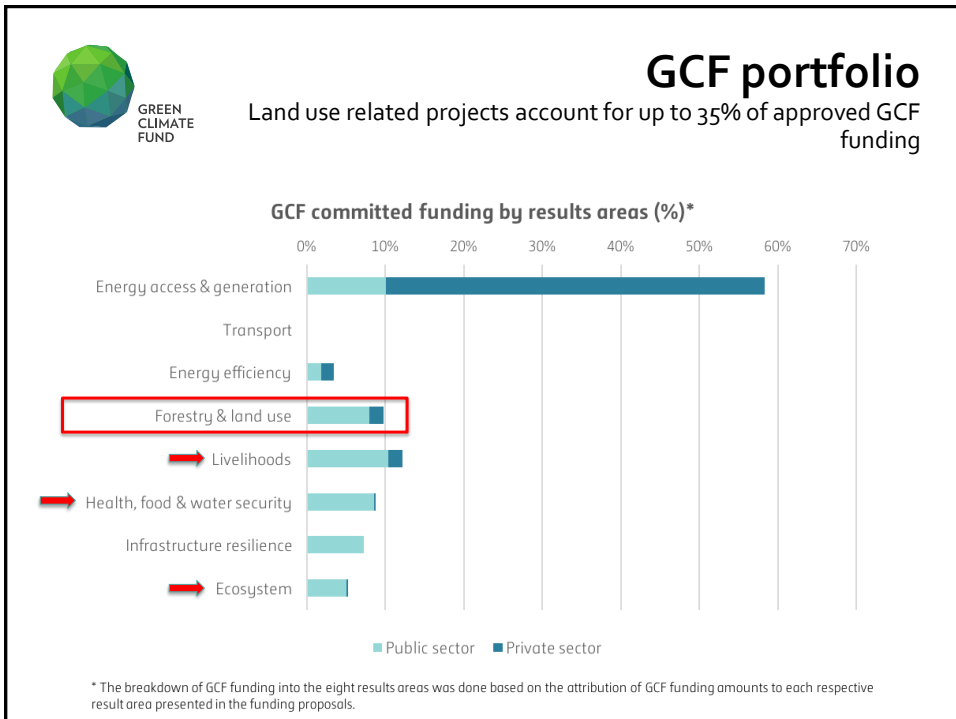

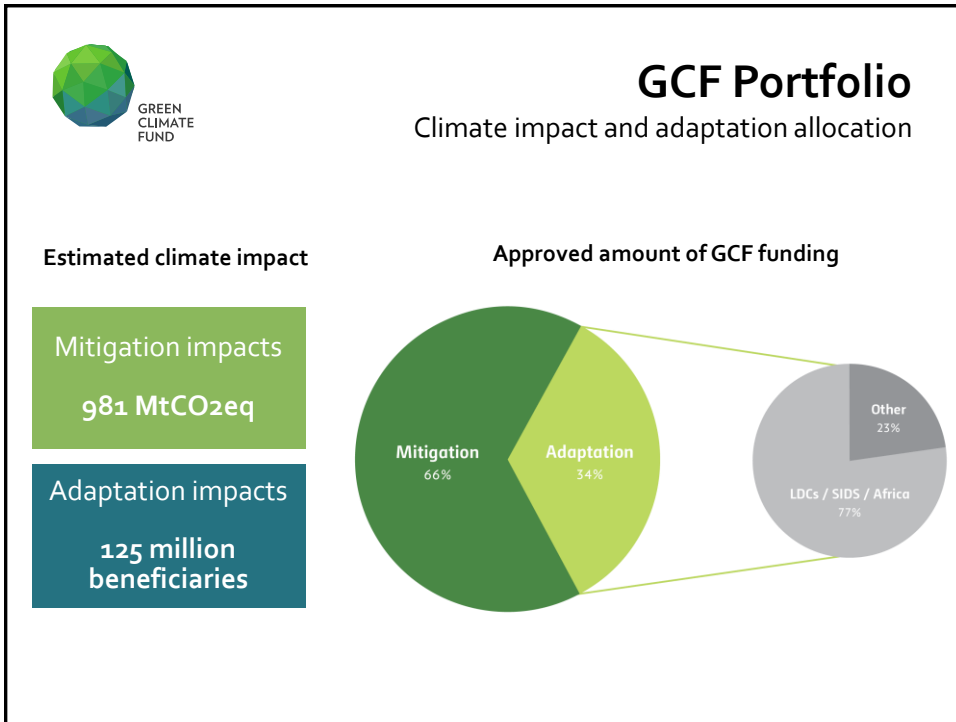

Region	Percentage
Africa	45%
Asia-Pacific	29%
LAC	22%
Eastern Europe	4%
LDCs, SIDS, AFRICA	8.4%
Other Developing Countries	16%

BY INSTRUMENT (%)

Instrument	Percentage
Grant	42%
Loan	39%
Equity	18%
Guarantee	1%

Forestry and land use portfolio

Key features

8 projects with USD 227 million of GCF funding (as at B.16)

Clear climate impacts & strong country ownership

Targeting both mitigation and adaptation results

Involvement of both public and private sectors

Financial instrument expected to be diversified

Key challenges in developing land use projects

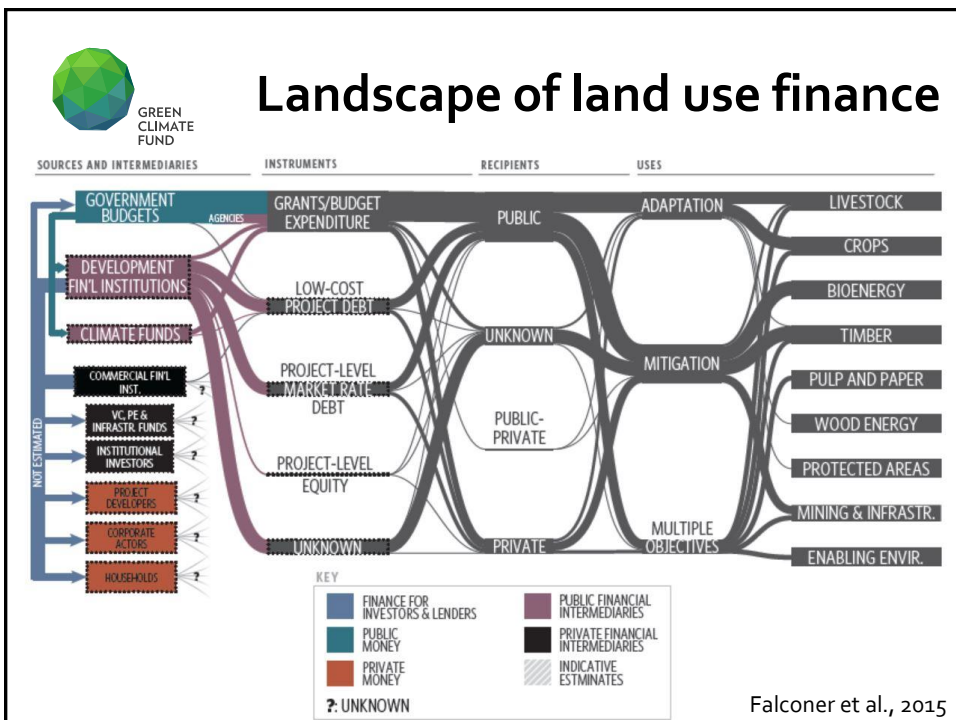

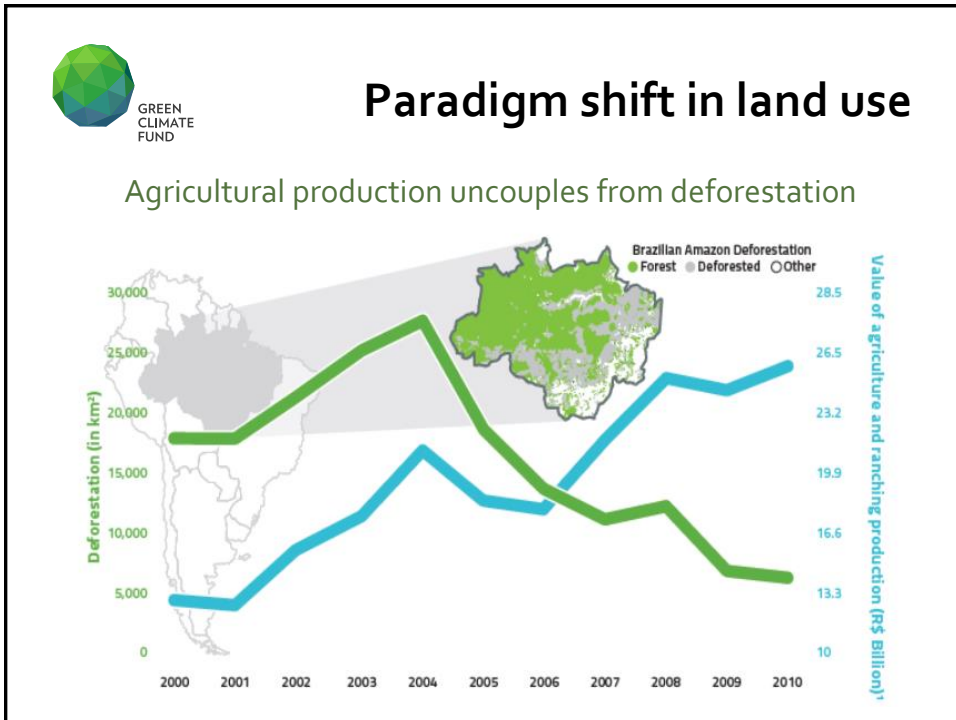

Small scale project-level

Concentrated in readiness and preparation

Lack of enabling environment (land tenure, policy, etc.)

Lack of coordination within the country

High concessionality (grant) requested in financial instrument

What kind of land use investments are we looking for?

Programmes at scale & landscape approach

Alignment with national climate change strategies, including NDCs, NAMA, NAP, REDD+

Strong coherence and coordination within the country

Various financial instruments (grant, loan, equity, guarantee) & leveraging co-financing and private sector finance

Innovative and paradigm shifting /transformative

Landscape approach

- Productive land and deforested areas

e.g. credit lines to improve loan conditions for sustainable agriculture

- Secondary forests threatened by deforestation

e.g. Sustainable forest management for timber & non-timber forest products, PES

- Primary forests

e.g. PPP in large scale conservation, ecotourism
