

About the authors

Dr **Uche Okpara** is a lecturer/fellow in climate change and state fragility at the Natural Resources Institute in the Faculty of Engineering and Science, University of Greenwich, UK. . He holds a PhD in Environmental Sustainability from the School of Earth and Environment, University of Leeds and has numerous publications on environment, security and development subjects in international, peer-reviewed journals. His research work is grounded in the motivation to improve understanding of the social and economic consequences of climate crisis and the promotion of integrated solutions to environmental degradation, gender inequality and food insecurity in fragile and conflict-affected states.

Professor **Lindsay Stringer** is Professor in Environment and Development at the Sustainability Research Institute, in the School of Earth and Environment, University of Leeds. She holds a PhD from the University of Sheffield. Lindsay has published >150 international journal papers. She was lead author on the IPBES Land Degradation and Restoration Assessment, coordinating lead author on the IPBES Africa Regional Assessment, was lead author for the IPCC Special Report on “climate change and land” and on the 6th IPCC Assessment Report, as well as coordinating lead author for the AR6 cross-chapter paper on drylands, desertification and semi-arid areas.

Dr **Mariam Akhtar-Schuster** is senior scientific advisor at the Project Management Agency in the German Aerospace Center (DLR-PT) in Berlin, Germany. Geographer by training, Dr. Akhtar-Schuster holds a PhD from the Faculty of Mathematics and Sciences, University of Goettingen, Germany. Since 1988, she conducted field research on desertification/land degradation and drought in northeast and southern Africa. She is co-founder and former chair of the independent scientific network DesertNet International. From 2014-2019, she was co-chair of UNCCD’s science-policy interface (SPI). In 2017 she was nominated by the IPCC as review editor for its special report on “climate change and land”.
