

Surya Narayana Reddy

Our experience with UNCCD is summarised on the following lines: Our experience is dedicated to Goal-15: Life on Land, and particularly Goal15.3, which aims to achieve Land Degradation Neutrality (LDN) in Asia and the Pacific by 2030. As land degradation is one of the threats to human and ecosystems, hence out of our experience gained for the last two decades as an accredited CSO, we could steer Asia and the Pacific region in close association with respective National Focal Points and local CSOs; with an ultimate aim to halt the trend of desertification and drought for improvement of livelihood options of

vulnerable people in particular. This can be realised by generation of awareness, motivation of the people for adoption of Sustainable Land Management (SLM) practices.

My passion towards mitigating DLDD and my contributions to The SPI, The UNCCD COPs, facilitating accreditation of Indian CSOs etc., would enable me to offer my services as CSO panel member.
