Affiliation and contact details *	azanou02@yahoo.fr

Performance Indicators

C. Performance indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Affected country Parties are requested to report on the following fourteen performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by affected country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Number and size of information events organized on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.

Understanding of the indicator

At the national and local level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by affected country Parties by reporting on Convention-related communication strategies at subregional, regional and global level.

Data needed

Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity.

Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.).

Events organized and media produced by the UNCCD NFP or organized/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.

Data sources (indicative only)

International and national media (newspapers) advertising the events at national and local level, the Internet, the organizers of the events, programmes/projects' final reports.

Check the glossary for

'NFP', 'ICT', 'Information events', 'Media products', 'STIs', 'CSOs'

Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).

Overall target

By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity

Number of information events

Year	Number of information events	Estimated number of participants in the information events
2008	11	3860

National contribution to the target

On the basis of the information you have provided above, estimate the proportion (%) of the population in your country which is informed about DLDD and DLDD synergies with climate change and biodiversity at the time of reporting?

Estimated share of total country population =

40 %

Qualitative assessment

Is the information you have provided on communication processes part of a national communication strategy addressing

environmental issues?

Yes

Performance indicator CONS-O-3 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3

Number of CSOs and science and technology institutions participating in the Convention processes.

Understanding of the indicator

At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

Data needed

The specification of the organizations involved in the programmes/projects as reported in the PPSs.

Data sources (indicative only)

PPSs submitted to the UNCCD as part of the reporting exercise.

Check the glossary for

'STIs', 'CSOs', 'PPS', 'Convention processes'

Overall target

A steady growth in the participation of CSOs and science and technology institutions in the Convention processes is recorded along the implementation period of The Strategy.

In the PPSs you have specified the number of CSOs and the number of STIs involved in each programme/project. Add these numbers and give the totals by year in the table below.

Year	Number of CSOs involved in DLDD-related programmes/projects	Number of STIs involved in DLDD-related programmes/projects
2008	102	10
2009	95	12
2010		
2011		
2012		
2013		
2014		
2015		
2016		
2017		
2018		

Sources of information

Programme and project sheets (PPSs) submitted to UNCCD

No answer required

National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the participation of CSOs and STIs in DLDD-related programmes and projects?

Yes

Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of the participation of CSOs and STIs to DLDD-related programmes/projects. (tick as many boxes as necessary and rate the level of importance)

		Not important	Important	Very important
X	Increased networking and collaboration opportunities		X	
X	Increased access to information and to national and/or international financing opportunities		X	
	Increased willingness of the government in working with CSOs			
	Increased interest of donors in working with CSOs			
	Strengthened organizational, project management and fund-raising capacity of CSOs			
X	Increased funding opportunities requiring partnership with the STIs			X
	Strengthened organizational, project management and fund-raising capacity of the STIs			
	Other			

Other (specify) (max 30 words)**No answer provided****Reasons for decreasing for CSOs**

		Not important	Important	Very important
X	Costly participatory processes		X	
X	Low organizational, fund-raising and project management capacity of CSOs		X	
	Government policies and/or the legal environment do not foster the engagement of CSOs			
X	Diminishing funding		X	
	Other			

Other (specify) (max 30 words)**No answer provided****Reasons for decreasing for STIs**

	Not important	Important	Very important
DLDD topics are not prioritized by national STIs			
Low organizational, fund-raising and project management capacity of STIs			
Decreased networking opportunities at national and international level			
X Diminishing funding		X	
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-4 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-4 for Outcome 1.3

Number and type of DLDD-related initiatives of CSOs and science and technology institutions in the field of education.

Understanding of the indicator

The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on “education” because “awareness” and “advocacy” are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level.

Data needed

Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula.

Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.

Data sources (indicative only)

CSOs and STIs operating in the country.

Check the glossary for

‘CSOs’, ‘STIs’, ‘NFP’, ‘Formal education’, ‘Non-formal education’.

Overall target

A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and science and technology institutions is recorded along the implementation period of The Strategy

Number of DLDD-related initiatives undertaken

Year	Number of DLDD-related initiatives undertaken by CSOs formal education	Number of DLDD-related initiatives undertaken by CSOs non-formal education	Number of DLDD-related initiatives undertaken by STIs formal education	Number of DLDD-related initiatives undertaken by STIs non-formal education

National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the delivery of DLDD-related initiatives in the education sector by CSOs and STIs?

Yes

Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of DLDD-related education initiatives undertaken by CSOs and STIs.

(tick as many boxes as necessary and rate the level of importance)

		Not important	Important	Very important
X	Increased access to funding		X	
X	Increased awareness of DLDD-related problems and of the need for action		X	
X	Increased knowledge of DLDD-related topics and enhanced skills of trainers/teachers		X	
X	Government policies are more supportive of education initiatives		X	
X	International donors are more supportive of education-focused initiatives.		X	
	Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for CSOs

	Not important	Important	Very important
Lack of financial resources			
Insufficient awareness and knowledge by national CSOs of DLDD-related issues			
Limited capillary presence of national CSOs at the grass-root level			
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for STIs

	Not important	Important	Very important
Lack of financial resources			
National STIs are more focussed on research activities than on education and training			
Other			

Other (specify) (max 30 words)

No answer provided

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Number of affected country Parties, subregional and regional entities to have finalized the formulation/revision of NAPs/SRAPs/RAPs aligned to The Strategy, taking into account biophysical and socio-economic information, national planning and policies, and integration into investment frameworks.

Understanding of the indicator

At the national level, the indicator measures the performance of affected country Parties in formulating or revising their NAPs in alignment with The Strategy. While providing information on this process, the indicator also outlines whether: (a) the analysis of DLDD drivers, barriers to possible solutions, and measures that may eventually overcome these barriers, has been carried out; (b) the alignment process has been supported by biophysical and socio-economic baseline information; (c) the action programmes have been included in integrated investment frameworks; and (d) the action programmes have been integrated with other existing national plans and policies. The indicator will inform on the extent to which Parties have responded to decision 3/COP.8, paragraph 45, and on the feasibility of assessing the progress of The Strategy over its implementation period (2008–2018). Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on formulation or revision of SRAPs and RAPs in alignment with The Strategy.

Data needed

UNCCD NAP. Only a NAP formally approved by the relevant governmental authorities is to be considered as 'finalized'. Other relevant planning documents.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'Finalized', 'NAP', 'NFP', 'driver', 'barrier', 'integrated investment framework', 'baseline'

Overall target

By 2014, at least 80 per cent of affected country Parties, subregional and regional entities have formulated/revise a NAP/SRAP/RAP aligned to The Strategy.

NAP Adoption and Revision

Had your country already adopted a NAP prior to The Strategy?

Yes

If yes, has your country revised the NAP in alignment with The Strategy?

No

If you have revised the NAP in alignment with The Strategy, specify the date of its approval.

No answer provided

If you have not revised the NAP in alignment with The Strategy, specify why the process was not initiated. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very Important
Not a priority for the government			
Lack of capacities			
Lack of financial resources			

	Understaffing			
	Lack of time			
	Poor internal coordination among relevant ministries			
X	Other			

Other (specify) (max 30 words)

le processus est en cours et il ne reste que la validation avec les acteurs à la base.

If your country had no NAP adopted prior to The Strategy, have you formulated an aligned NAP after The Strategy's adoption in 2008?

No answer provided

If yes, specify the date of its approval.

No answer provided

If at the time of reporting you have not formulated a NAP aligned to The Strategy specify why the process was not initiated. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very Important
Not a priority for the government			
Lack of capacities			
Lack of financial resources			
Understaffing			
Lack of time			
Poor internal coordination among relevant ministries			
Other			

Other (specify) (max 30 words)

No answer provided

The questions below apply only to those countries having a NAP aligned to The Strategy

If you have a NAP, is it supported by biophysical and socio-economic baseline information?

Yes

If you have a NAP, does it assess DLDD drivers?

Yes

If you have a NAP, does it assess the barriers to sustainable land management?

Yes

If yes, does the NAP include recommendations to remove these barriers?

Yes

If you have a NAP, has it been included into an integrated investment framework?

Yes

If you have a NAP, has it been integrated into national development planning and relevant sectoral and investment plans and policies?

Yes

If yes, has the NAP been integrated into your country's Poverty Reduction Strategy Paper?

Yes

Did you refer to the Guidelines on the alignment of action programmes with The Strategy as proposed in ICCD/COP(9)/2/Add.1 while developing or reviewing your action plan?

Yes

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

Insuffisance des ressources financières.

Performance indicator CONS-O-7 for Outcome 2.5

Performance indicator CONS-O-7 for Outcome 2.5

Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator

The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place at the national level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. This information will be complemented by the reporting of other reporting entities on synergistic processes at the subregional, regional and global level.

Data needed

Planning/programming documents and legislative/regulatory documents.

Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

“Joint planning/programming initiatives”, “Operational mechanisms for joint implementation or mutual reinforcement”

For an indicative list of activities by Parties to promote synergies among the Rio Conventions, refer to [target=' blank>UNEP/CBD /COP/DC/IX/16, Annex II](#)

Overall target

By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions

Are you implementing joint planning/programming initiatives for the three Rio Conventions?

Yes

If yes, specify the type of joint initiative(s) (tick as many boxes as necessary)

- Review of national plans and identification of gaps in synergies
- Identification of sectors and policies that could benefit from synergies and cooperation
- Enhancement of the institutional and scientific capacity of relevant stakeholders as well as of their awareness

Other (specify) (max 30 words)

No answer provided

Do operational mechanisms for joint implementation or mutual reinforcement exist in your country?

Yes

If yes, specify the type of mechanism(s) (tick as many boxes as necessary)

- Carry out of periodic meetings between focal points and focal point teams
- Establishment of a national coordinating committee for implementation of the three Rio Conventions

Other (specify) (max 30 words)

No answer provided

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

- L'arrêté de mise en place du Comité;

Les rapports de réunion.

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional /regional monitoring system for DLDD.

Understanding of the indicator

At the national level, the indicator measures the monitoring potential of the country by quantifying the number of monitoring systems established and supported. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties during the implementation of The Strategy and beyond. This information will be complemented by the reporting of other reporting entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.

Data needed

Information on monitoring systems established within the national Ministries or other bodies/institutions.

Programmes/projects' documents, fiches and summary sheets, programmes/projects' interim or final reports.

Only those monitoring systems storing all or most of the information needed for reporting to the UNCCD shall be considered.

Data sources (indicative only)

Relevant national ministries, programme/project management units, other non-governmental initiatives.

Check the glossary for

'monitoring system', 'vulnerability'

Overall target

By 2018, at least 60 per cent of affected country Parties, subregional and regional reporting entities have established and supported national monitoring systems for DLDD

Is a monitoring system for DLDD established at the national level?

Yes

If yes, specify whether this system is: Functional

Yes

If yes, specify whether this system is: Regularly Updated

No

If no DLDD-specific monitoring system is in place, is an environmental monitoring system partially covering DLDD established at the national level?

No answer provided

List any monitoring system available at the sub- national level that can contribute to the UNCCD reporting (add as many rows as necessary).

- **Autorité du Bassin du Niger;**
Autorité du Bassin de la Volta;
AGRYMETH;
CILSS

Depuis 1999, le Comité de suivi fonctionnait par un appui national. De 2004 à 2007, le comité n'a pas été très opérationnel. En 2007 et 2008, il a été dynamisé grâce à l'appui de la GTZ, appui dont on ne bénéficie plus

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Number of affected country Parties, subregional and regional entities reporting to the Convention along revised reporting guidelines on the basis of agreed indicators

Understanding of the indicator

The indicator measures the use of biophysical and socio-economic information at the national level in defining a commonly agreed core set of impact indicators for the UNCCD and in monitoring progress against these indicators using harmonized methodologies.

The indicator will inform to what extent it is possible to compile a comparable and global assessment of UNCCD impact.

Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the use of impact indicators at the subregional and regional levels, if and when impact indicators for these levels will be commonly agreed upon by the Conference of the Parties.

Data needed

Reports to the UNCCD by affected country Parties in 2012 and 2016.

The information to report on this indicator will be compiled by affected country Parties every four years when reporting on the strategic objectives that require biophysical and socio-economic information (i.e. SO1, SO2 and SO3). Reporting on this indicator is due in 2012 and in 2016 only.

Data sources (indicative only)

UNCCD NFP.

*Check the glossary for
'NFP'*

Overall target

By 2018, at least 90 per cent of affected country Parties, subregional and regional reporting entities report to the Convention in compliance with the new reporting guidelines.

Has your country reported on the two impact indicators considered by decision 13/COP.9 to be the minimum reporting requirement?

No answer required for this indicator in the 2010 reporting cycle

Number of impact indicators for strategic objectives 1, 2 and 3 your country has reported on in 2012 and 2016

2012
No answer required for this indicator in the 2010 reporting cycle

2016

No answer required for this indicator in the 2010 reporting cycle

While reporting on impact indicators, did you refer to the reporting guidelines, i.e. using the common baselines and methodologies defined by the CST?

No answer required for this indicator in the 2010 reporting cycle

Sources of information

Specify the sources used to extract the information provided above (add as many rows information as necessary). If reporting online, you may also upload relevant documents.

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Number of revised NAPs/SRAPs/RAPs reflecting knowledge of DLDD drivers and their interactions, and of the interaction of DLDD with climate change and biodiversity.

Understanding of the indicator

The indicator measures knowledge-transfer processes from the theoretical to the operational level. This is done through an assessment carried out by affected country Parties (self-assessment) of the levels of traditional and scientific knowledge reflected in their NAPs. The assumption is that NAPs based on sound scientific and traditional knowledge will propose more significant and effective strategies and activities for implementation at the national level, and will, ultimately, perform better than those NAPs that do not take into account available knowledge on DLDD and DLDD synergies. The indicator will inform to what extent UNCCD implementation is likely to achieve meaningful results. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the assessment of their SRAPs and RAPs.

Data needed

NAP aligned to The Strategy.

Scientific literature consulted for the development of the NAP.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'NAP', 'NFP', 'driver'

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

Overall target

By 2018, at least 70 per cent of revised NAPs/SRAPs/RAPs have successfully gone through a quality self-assessment.

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

In your NAP, is the identification of biophysical and socio-economic drivers, and of their interaction, knowledge-based?

Yes

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

- Scientific literature
- Expert knowledge
- Traditional knowledge

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If reporting online, you may also upload relevant documents.

- - Convention des Nations Unies sur la Lutte contre la Désertification;
- Rapport d'étude sur la durabilité de la croissance économique et la lutte contre la pauvreté (MEHU-DAT 1998);
- Agenda 21 National;
- - Plan d'Action Environnemental(MEHU 1993);
- Rapport d'Etude sur la sécurité Energétique (BIAOU et AI 1958);
- Stratégie de Développement au Bénin à l'horizon 2025 (MPREPE/PNUD, 1999)
- - Rapport du Forum des acteurs Non Gouvernementaux du Bénin sur la Désertification (Quenum et AI 1997);
- Rapport d'Etude sur la Sécurité Alimentaire (GANTA et AI).

In your NAP, is the analysis of the interaction between drought mitigation and restoration of degraded land and climate change mitigation/ adaptation or biodiversity conservation knowledge-based?

Yes

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

- Scientific literature
- Expert knowledge
- Traditional knowledge

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If reporting online, you may also upload relevant documents.

- - Rapport d'étude sur la problématique des feux de brousse au Bénin MEHU-DAT 1999;
- Rapport d'étude sur l'aménagement des territoires MEHU-DAT 1998;
AGENDA 21 National;
- - PLAN d'Action Environnemental;
- Stratégie de Développement au Bénin à l'horizon 2025 (MPREPE/PNUD, 1999);
- Problématiques Agro-pédologiques au Bénin (MDR-INRAB 1999).

Is drought mitigation analyzed and/or reflected in some of the actions outlined in the NAP?

Yes

Performance indicator CONS-O-11 for Outcome 3.5

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-11 for Outcome 3.5

Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator

The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Data needed

Information from websites.

Only DLDD-relevant knowledge-sharing systems and networks shall be considered.

Data sources (indicative only)

Relevant organizations at the national level, relevant national ministries hosting knowledge-sharing systems and networks within their websites.

Check the glossary for

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments

Understanding of the indicator

At the national level the indicator measures the presence of capacity-building processes through the quantification of existing major capacity-building initiatives. The indicator will inform to what extent affected country Parties may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). This information will be complemented by the reporting of other reporting entities on existing UNCCD-related capacity-building initiatives at the subregional, regional and global level.

Data needed

Information on DLDD-related capacity building initiatives.

Only major capacity-building plans/programmes/projects mentioned in the PPSs are to be considered.

Data sources (indicative only)

PPSs submitted to UNCCD as part of the reporting exercise

Programmes/projects' documents, fiches and summary sheets, interim or final reports of those programmes and projects identified through the PPSs as having DLDD-related capacity-building as a major objective.

Check the glossary for

'NCSA', 'PPS'

Overall target

By 2014, at least 90 per cent of affected country Parties, sub-regional and regional reporting entities implement DLDD specific capacity building plans or programs or projects.

Number of DLDD-related capacity building initiatives undertaken

Identify, if any, relevant programmes and projects through the PPSs and check corresponding programmes/projects' documents, fiches and summary sheets, and interim or final reports, to extract the information needed for completing the table below

Year	NCSA-generated	Other initiatives

If at the time of reporting there are no DLDD-specific capacity building plans, programmes or projects implemented in your country, when do you plan to have something in place?

No answer provided

Qualitative assessment

Have you received assistance from one or more of the following institutions to build capacities to combat DLDD? (more than one box can be ticked)

- **Bilateral**
- **Multilateral (UN agencies, IGOs, international financing institutions, etc.)**

If yes, which type of assistance have you received?

- **Financial support**

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, reflect leveraging national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator

At the national level, the indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating desertification and land degradation, through the quantification of investment frameworks developed by country Parties within the IFS devised by the GM or other integrated financing strategies promoted by diverse international institutions. This information will be complemented by the reporting of other reporting entities on the establishment of integrated investment frameworks at national, subregional and regional level.

Data needed

Investment frameworks documents.

Only investment frameworks prepared along the guidelines devised within integrated financing strategies shall be considered.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

'IFS', 'NAP' 'leveraging', 'integrated investment framework'

Overall target

By 2014, at least 50 per cent of affected country Parties, subregional and regional entities have developed integrated investment frameworks.

Has your country developed an integrated investment framework?

Yes

If yes, specify when it was developed.

2008

The questions below apply only to those countries which have an integrated investment framework.

Is your integrated investment framework based on the NAP?

Yes

If based on the NAP, who assisted in its development?

- **GM**
- **Bilateral**

Other (specify) (max 30 words)

Le Bénin a bénéficié du soutien financier de la GTZ, de l'appui technique du Mécanisme Mondial

If assisted, which type of assistance did you receive?

- **Technical support**
- **Financial support**
- **Capacity building**

If assisted by the GM, was it devised within the IFS?

Yes

If your country has an integrated investment framework based on the NAP, is this framework concretely allowing the leverage of national, bilateral and multilateral resources for combating DLDD?

Yes

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

Toutes les conditions requises étaient réunies

Performance indicator CONS-O-16 for Outcome 5.2

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-16 for Outcome 5.2

Degree of adequacy, timeliness and predictability of financial resources made available by developed country Parties to combat DLDD.

Understanding of the indicator

This is a qualitative indicator requiring the perception-based assessment by developing affected country Parties of the adequacy, timeliness and predictability of bilateral contributions received from developed country Parties for the implementation of the

Convention. "Adequate", "timely" and "predictable" resources are frequently referred to in The Strategy as being necessary to ensure proper planning and effective implementation. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on their perception-based assessments.

Data needed

-

Data sources (indicative only)

-

Check the glossary for

-

Only affected country Parties entitled to receive assistance under the UNCCD are requested to report on this indicator.

Overall target

No target has been set for this indicator

How would you rate the bilateral assistance received within the framework of UNCCD for the implementation of The Strategy and of the Convention?

Adequacy of bilateral assistance

Not adequate

Timeliness of bilateral assistance

Fairly timely

Predictability of bilateral assistance

Fairly predictable

Provide narrative justification on your above rating (max 100 words)

Avec l'ampleur des problèmes, les aides reçues semblent toujours insuffisantes et ne viennent pas au moment opportun.

Qualitative assessment

Did you receive assistance in raising resources from bilateral donors?

Yes

If yes, from whom? (more than one box can be ticked)

- secretariat
- **Bilateral**
- **Multilateral (UN agencies, IGOs, international financing institutions, etc.)**

Other (specify) (max 30 words)

Des appuis financiers ont été reçus pour la mise en oeuvre de plusieurs projets dans des domaines liés à la lutte contre la désertification

Has the level of adequacy, timeliness and predictability of bilateral assistance constrained your country's performance in planning and implementation with respect to UNCCD?

No

Performance indicator CONS-O-17 for Outcome 5.3

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-17 for Outcome 5.3

Number of DLDD-related project proposals successfully submitted for financing to international financial institutions, facilities and

funds, including the GEF.

Understanding of the indicator

The indicator measures the capacity of fund-raising at the national level, through the quantification of project proposals successfully submitted for funding to the various financing organizations. The indicator will inform to what extent affected country Parties make increasing efforts to mobilize resources. This information will be complemented by the reporting of other reporting entities on the fund-raising efforts at national, subregional and regional level.

Data needed

Information contained in the PPSs and SFAs submitted to UNCCD.

Data sources (indicative only)

PPSs and SFAs submitted to UNCCD as part of the reporting exercise.

The PPS requires specification of the project 'status' thus it allows the identification of relevant projects to be considered by this indicator and the monitoring of their approval status.

The SFA requires the specification of amounts committed to approved projects.

Check the glossary for

'PPS', 'SFA', 'Project proposals', 'currency', 'Successfully submitted proposals'

Overall target

A steady growth in the number of DLDD-related successfully submitted project proposals is recorded along the implementation period of The Strategy.

Number of project proposals submitted (pipeline) and ongoing, by biennium

Biennium	submitted (pipeline)	ongoing
2008-2009	0	0
2010-2011		
2012-2013		
2014-2015		
2016-2017		

Amount of funds raised, by biennium

You can find the amount of funds raised for the ongoing projects in the corresponding SFAs. Sum these amounts and give the total in the below table.

Biennium	Total amount
2008-2009	---
2010-2011	
2012-2013	
2014-2015	
2016-2017	

Sources of information

Specify the sources used to extract the information provided above: Programme and Project Sheets and Standard Financial Annexes

No answer required

National contribution to the target

According to the information provided above, do you think that you are mobilizing enough resources from international financial institutions, facilities and funds through successfully submitted project proposals?

No

If no, do you plan to increase the country's efforts in presenting project proposals to international financial institutions, facilities and funds?

Yes

Qualitative assessment

Identify the reasons for the increasing or decreasing trend of project proposals successfully submitted to international financial institutions, facilities and funds (tick as many boxes as necessary and rate the level of importance).

Reasons for increasing

	Not important	Important	Very Important
Easier and more transparent application procedures			
Increased capacities of national stakeholders to prepare applications			
Major natural hazards occurred at the national level considerably increased the level of resources made available by the international community			
Access to funding is increasingly facilitated by third parties such as the private sector			
Existence of a financing strategy (IFS or others)			
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing

	Not important	Important	Very Important
Financing opportunities are not publicised enough, lack of access to necessary information			
Complicated application procedures, the level of complexity being worsened by the different requirements of the various donors			
Limited financial resources are made available for DLDD-related programmes/projects, and lack of DLDD-specific allocations within donors' portfolio.			
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-18 for Outcome 5.5

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-18 for Outcome 5.5

Amount of financial resources and type of incentives which have enabled access to technology by affected country Parties.

Understanding of the indicator

The indicator measures whether access to technology is facilitated by means of financial resources or economic and policy incentives. The indicator will inform to what extent an enabling environment for technology transfer has been created at the national level and whether sufficient resources are dedicated to technology transfer. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on financial resources and type of incentives which have enabled access to technology at the subregional and regional level.

Data needed

Budgets of relevant programmes and projects

Information on policy/regulatory, financial and fiscal incentives. Incentives facilitating access to technology shall be those established and implemented at the national level, not necessarily within the framework of DLDD-related cooperation.

Data sources (indicative only)

Financial documents of programmes and projects submitted as PPSs to the UNCCD as part of the reporting exercise.

National policy, regulatory and economic/financial documents.

Check the glossary for

'technical support', 'incentive', 'PPS'

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Overall targets

A steady growth in the financial resources allocated to facilitate access to technology by affected country Parties is recorded along the implementation period of The Strategy.

A steady growth in the number of economic and policy incentives reported upon is recorded along the implementation period of The Strategy.

Estimate of amounts allocated to facilitate technology transfer

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Standard Financial Annex

D. Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilized by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimize double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organization, and the funding period, if applicable;

(c) Classification, i.e. categorization of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.

Programme and Project Sheets

E. Programme and Project Sheet

Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.

The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.

A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorized using the Rio Markers for desertification and Relevant Activity Codes (RACs).

Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the UN Convention on Biological Diversity, CBD – and the UN Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.

The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.

Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.

To minimize the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.

In the PPS template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by country Parties and other reporting entities with relevant data or narrative information.

Programme/Project #1

Title

Enter the Programme/Project title, and sub-title if applicable

Additional Information

F. Additional information

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by affected country Parties and consequently to make more targeted and specific recommendations to the COP. It allows affected country Parties to comment or report upon issues that are not covered elsewhere but that are nevertheless of importance at the national level or within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process and on the implementation of NAPs as well as lessons learnt, problems, constraints and bottlenecks faced in terms of human and financial resources. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of affected country Parties within the framework of the Convention, as requested by decision 13/COP.9, paragraph 17.

Reporting process-related issues

Financial resources

Could your country count on sufficient financial resources to meet UNCCD reporting obligations?

No

Provide an estimate of the amount invested from your country's national budget into the UNCCD reporting process.

No answer provided

Human resources

How many people were involved in your country in the UNCCD reporting process?

Number of people

100

Estimate the total number of person/day dedicated by these persons to the UNCCD reporting process:

Number of person/day

2500

Knowledge

Could your country count on sufficient technical and scientific knowledge to meet UNCCD reporting obligations?

No

Coordination

Was coordination with the relevant implementing agencies satisfactory in order to apply for necessary funds?

Yes

Was coordination at the national level with the relevant line ministries satisfactory in order to comprehensively and coherently report?

Yes

Participation and consultation

Was a participatory or consultative approach applied to involve all relevant stakeholders in the reporting process?

Yes

Validation meeting

Was a validation meeting held as a tool to integrate stakeholders in the reporting process?

Yes

Subregional and regional processes

Did your country actively contribute to the subregional and regional reporting processes?

Yes

PRAIS portal

If you are reporting online, did you receive sufficient training on access and utilization of the PRAIS portal?

Yes

Accommodation of specific requests within COP decisions

Report on specific COP requests – iterative process on indicators

Decision 13/COP.9, paragraphs 2, 3 and 24, envisages an iterative process to refine the set of performance indicators provisionally adopted by the same decision. As a tool to implement this iterative process, affected country Parties can provide here their suggestions and recommendations for improvement.

Tick the cells only when you have experienced difficulties in reporting on one, or more, indicator(s). Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.

Reporting on the implementation of NAP

Which is the percentage of activities included in the NAP that are currently implemented?

31-60%

Human resources

Lessons learnt (report on the 2 most important only)

1

La plupart des autorités locales et des communautés des localités ciblées touchées par la désertification et qui ont bénéficié des projets des domaines d'activités sont sensibilisées sur les effets de la désertification et informées de ses conséquences

2

Des activités de protection de l'environnement et de réhabilitation des terres sont programmées dans les Plans de Développement Locaux actuels dans la plupart des communes affectées par le phénomène

Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)

1

Insuffisances de ressources financières pour la prise en compte de toutes les communes touchées par les projets;
insuffisances d'appuis techniques;
manque de technologies appropriées

2

No answer provided

Financial resources

Lessons learnt (report on the 2 most important only)

1

L'appui des partenaires permet de mettre en exécution dans certaines localités dont les acteurs sont impliqués pour la pérennisation des projets

2

les femmes et les jeunes sont aujourd'hui impliqués et sensibilisés pour l'appropriation des formations et leçons reçues à cet effet.

Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)

1

Aggravation des conséquences du phénomène par l'augmentation de la population avec l'insuffisance des terres;

l'accentuation des changements climatiques;

2

Difficultés de mobilisation des ressources financières allouées par le FEM et à rechercher avec la coopération bilatérale et autres agences ;

Any other country-specific issues

Has your country any specific issue to bring to the attention of the Conference of the Parties?

Yes

If yes, please specify under which of the following broad categories it can be classified.

Category

Funding/resource mobilization

Other (specify) (max 30 words)

No answer provided

Narrative description

No answer provided

Best Practices

G. Best practices

According to decision 13/COP.9, Annex V, UNCCD best practices shall be collected according to seven themes: 1. SLM technologies, including adaptation; 2. Capacity building and awareness raising; 3. DLDD and SLM monitoring and assessment/research; 4. Knowledge management and decision support; 5. Policy, legislative, institutional framework; 6. Funding/resource mobilization; 7. Participation, collaboration and networking.

While themes 2 to 7 represent different elements of the enabling environment needed for the implementation and dissemination/up-scaling of sustainable land management (SLM) technologies (indirect impact), theme 1 comprises all actions on the ground that have a direct impact on desertification, land degradation and drought mitigation.

In particular, as specified in document ICCD/CRIC(8)/5/Add.5, paragraph 12, theme 1 'SLM technologies, including adaptation' refers to SLM technologies that directly contribute to the prevention, mitigation and rehabilitation of desertification and land degradation on cropland, grazing land and woodland, with the aim of improving the livelihoods of affected populations and conserving ecosystem services. Successful implementation of SLM technologies is the base for achieving strategic objectives 1, 2 and 3 of The Strategy. Theme 1 also integrates five of the strategic areas defined by decision 8/COP.4, namely: (a) sustainable land use management, including water, soil and vegetation in affected areas; (b) sustainable use and management of rangelands; (c) development of sustainable agricultural and ranching production systems; (d) development of new and renewable energy sources; and (e) launching of reforestation/afforestation programmes/ intensification of soil conservation programmes.

ICCD/CRIC(8)/5/Add.5 provides definitions for 'practice', 'good practice' and 'best practice'. These definitions are included in the common glossary that shall be referred to by Parties and other reporting entities while reporting to UNCCD, according to decision 13/COP.9, paragraph 8.

The template for reporting is based on the general structure for the documentation of best practices contained in ICCD/CRIC(8)/5/Add.5, paragraphs 40 to 43; it is tailored to the documentation of best practices related to theme 1 'SLM technologies, including adaptation'.

Best Practice #2 — Billonnage suivant les courbes de niveau : Ados végétalisé (Technologie vulgarisé par le Projet de Gestion des Terroirs et ressources Naturelles (PGTRN))

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Billonnage suivant les courbes de niveau : Ados végétalisé (Technologie vulgarisé par le Projet de Gestion des Terroirs et ressources Naturelles (PGTRN))

Location (if available, also include a map)

Communes de Ouèssè, Ouaké et Boukoumbé.

Attachments:

- o Carte.pdf

If the location has well defined boundaries, specify its extension in hectares

Hectares (ha)

3260

Estimated population living in the location

Number of people

288560

Prevailing land use within the specified location

- Cropland
- Grazing land
- Unproductive land

Other (specify) (max 30 words)

No answer provided

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Le climat du Bénin est de type subéquatorial. On distingue dans le Département de l'Atlantique où la technologie est mise en œuvre, une grande et petite saison pluvieuse et une grande et petite saison sèches

Soil: (max 50 words)

On rencontre dans la zone d'intervention, les sols ferrallitiques pauvres et des sols sableux.

Topography: (max 50 words)

Le département de l'Atlantique est situé sur un plateau.

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

Environ 42% de la population du Département de l'Atlantique dépensent moins d'un dollar par jour et la part du 5ème le plus pauvre dans la consommation total est 6,11%. (EMICOV 2007)

Main income sources: (max 50 words)

Les populations vivant sur le site ou à proximité du site tirent leurs revenus de la production agricole, de l'élevage et de la pêche

Land tenure and land use rights: (max 50 words)

Le régime de propriété qu'on rencontre dans le département de l'Atlantique est :

l'achat ;

l'héritage et le ;

Don.

Les droits d'usage :

La location ;

Le métayage,

L'emprunt ;

Le gage.

Short description of the best practice

max 250 words

La technologie mise en place pour lutter contre l'érosion hydrique consiste en la confection des billons perpendiculairement à la pente et leur végétalisation. Cette végétalisation consiste à fixer les ados avec des plantes ou avec des herbacés. Mise à part la fonction de réduction de l'effet érosif de l'eau que jouent les billons, les plantes jouent le rôle de fixation de l'azote de l'air qui est absorbé par le sol en vue de l'amélioration du niveau de fertilité des sols.

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

- Le secteur agricole, fortement tributaire des stimuli climatiques se trouve sérieusement menacé par les changements climatiques;
 - Régit par un climat de type sub-équatorial, le Bénin subit une péjoration climatique récente avec de fortes variabilités spatio-temporelles des précipitations, alternant périodes sèches et périodes humides ;
 - Une étude réalisée par Bokonon-Ganta et al (2003) au Bénin a montré qu'à l'horizon 2025, les changements climatiques vont entraîner une baisse considérable de la production des cultures du coton (-29,58%), niébé, maïs, manioc, arachide et le riz (-6%); ce qui aura pour conséquence un appauvrissement continu des populations, la baisse du disponible alimentaire et la vulnérabilité des terroirs.
-

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- Prevention
 - Mitigation
-

Main problems addressed by the best practice

(max 50 words)

-  le maintien de la fertilité des sols et la gestion durable des terres ;
 -  la lutte contre l'érosion, la pauvreté et de l'instauration d'une sécurité alimentaire durable
-

Outline specific land degradation problems addressed by the best practice

max 100 words

-  le maintien de la fertilité des sols et la gestion durable des terres ;
 -  la lutte contre la pauvreté et de l'instauration d'une sécurité alimentaire durable
-

Specify the objectives of the best practice

(max 50 words)

- 1- Assurer une technologie de restauration de fertilité des sols facilement reproductible par les producteurs ;
 - 2- Créer les conditions optimales pour faciliter la réalisation d'actions concrètes visant la préservation et l'amélioration de la productivité des terres.
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- Catalyser un processus de réflexion chez les populations et élus locaux des départements ciblés
Permettre aux populations un meilleur accès aux prévisions climatiques et d'être alertées lorsqu'il y a des risques.

Objective 2

(max 50 words)

- Mettre à la disposition des agriculteurs et du public en général les acquis de la recherche ;
Encourager l'expérimentation paysanne ;

Encourager la gestion intégrée de la fertilité des sols ;
Encourager la valorisation du potentiel hydro-agricole.

Objective 3

(max 50 words)

No answer provided

Objective 4

(max 50 words)

No answer provided

Short description of the technology

max 250 words

La technologie de restauration de la fertilité des sols, appelée « Zaï » est utilisée au Sud plus précisément dans le département de l'Atlantique, consiste à implanter une tranchée le long des plantes dans laquelle sont enfouis les résidus de récolte, les ordures ménagères etc qui se décomposent, enrichissent le sol et conserve l'humidité. Cette tranchée est utilisée la campagne prochaine comme la bande sur laquelle sera semé le maïs ou de légumineuses (Niébé). Ainsi, il permet de conserver de l'eau, réduit l'érosion des sols et améliore le niveau de fertilité des sols à partir des engrais verts. Cette pratique est utilisée dans les zones à forte pression agro foncière ayant des terres très dégradées.

Technical specifications of the technology - if any

max 250 words

La tranchée a pour largeur 20 à 30 centimètres, 15 à 20 centimètres de profondeur. Elle est remplie de résidus de récolte et ordures ménagères. La longueur est fonction de la longueur de la ligne de semis.

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

IDID-ONG

Address

No answer provided

Was the technology developed in partnership?

Yes

If yes, list the partners:

- 1. GRAIB-ONG
- 2. JESSF-CIDES-ONG
- 3. Faculté d'Agronomie de l'Université de Parakou

Specify the framework within which the technology was promoted

- Local initiative
- National initiative – non-government-led
- Programme/project-based initiative

Other (specify) (max 30 words)

No answer provided

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- 1. Les Producteurs modèles
 - 2. GRAIB-ONG
 - 3. JESSF-CIDES-ONG
 - 4. Faculté d'Agronomie de l'Université de Parakou
 - 5. Laboratoire de Sciences du Sol, Eau et Environnement.
-

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

Dans le cadre de l'introduction et de l'utilisation de la technologie, les ONG associées ont joué le rôle de vulgarisateur et d'appui-conseils à travers les séances d'information et de formation des productions, le suivi des conseils pratiques et évaluation des impacts de la technologie.

Quant aux institutions de recherche, elles ont contribué à l'identification de la bonne pratique et à l'amélioration de l'itinéraire technologique.

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- Participatory approaches

Other (specify) (max 30 words)

No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
 - 2. To improve the conditions of affected ecosystems
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

. Amélioration des rendements des cultures

2. (max 50 words)

No answer provided

Socio-economic level (including cultural level):

1. (max 50 words)

1. Amélioration des revenus des ménages

2. (max 50 words)

No answer provided

Environmental level:

1. (max 50 words)

. Protection des terres contre l'érosion hydrique

2. (max 50 words)

No answer provided

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

1. Le rendement des cultures pour cette campagne a incité d'autres producteurs à dupliquer la technologie pour accroître le rendement de leurs cultures.

2. Cette technologie facile à reproduire a un effet multiplicateur.

2. (max 50 words)

No answer provided

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

L'impact positif sur la préservation de la biodiversité est celui de la restauration du niveau de fertilité des sols qui sont le support des végétaux. Le bon niveau des sols favorise la régénération des ligneux.

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

Yes

Explain the reasons:

max 250 words

La meilleure pratique a surtout un impact positif sur l'adaptation au changement climatique du fait que le Zai permet de conserver de l'eau dans le sol pour les cultures pendant un temps même si une rupture de pluie s'installait.

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

No answer provided

Explain the reasons:

max 250 words

No answer provided

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising

- DLDD and SLM monitoring and assessment/research
 - Knowledge management and decision support
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Départements de l'Atacora et de l'Alibori où la pluviométrie ne cesse de baisser.
-

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
 - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
 - Fiscal incentives (for example, exemption from or reduction of taxes, duties, fees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

1. Simplicité de réalisation.

2. (max 50 words)

2. Accès aux intrants (résidus de récolte) et ;

3. (max 50 words)

3. Effet à court terme.

Ces conditions de réussite sont liées :

- a- (a) liée au contexte local,
 - b- (b) transposable avec un certain degré d'adaptation.
-

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
 - Sub-national
 - National
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- **1. La mise en place de la technologie ne demande pas de main d'œuvre importante. Ici il s'agit de travail de sol et de gestion des terres.**

Related to financial aspects

(max 50 words)

- **1. La technologie ne nécessite pas d'intrants extérieurs qui requièrent de ressources financières.**

Related to technical aspects

(max 50 words)

- **1. La technologie est très simple à mettre en place**

Best Practice #3 — Jachère améliorée de Cajanus cajan (Appuyée par le Projet de Gestion des Terroirs et ressources Naturelles (PGTRN)) Elle participe à l'amélioration du niveau de fertilité des sols et à l'élimination des mauvaises herbes notamment l'Imperata cylindrica. Cette pratique est endogène et rentre dans les

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Jachère améliorée de Cajanus cajan (Appuyée par le Projet de Gestion des Terroirs et ressources Naturelles (PGTRN))

Elle participe à l'amélioration du niveau de fertilité des sols et à l'élimination des mauvaises herbes notamment l'Imperata cylindrica. Cette pratique est endogène et rentre dans les

Location (if available, also include a map)

Département du Couffo

Attachments:

- Carte.pdf
-

If the location has well defined boundaries, specify its extension in hectares

Hectares (ha)

No answer provided

Estimated population living in the location

Number of people

409400

Prevailing land use within the specified location

- Cropland

Other (specify) (max 30 words)

No answer provided

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Le climat du Couffo est de type soudano-guinéen à deux saisons pluvieuses et à deux sèches. La hauteur naturelle de pluie varie entre 800 mm et 1200 mm. L'humidité relative est considérable et peut atteindre 85%. Le nombre de jours de pluies tourne autour de 100 jours par an et la période de croissance végétative varie entre 210 jours et 240 jours.

Soil: (max 50 words)

Dans le Département du Couffo, on distingue trois zones agro-écologiques à savoir :

- Zone des savanes avec des sols ferrugineux tropicaux sur le socle cristallin aux caractéristiques très variables ;

- Zone de terre de barre avec des sols de type ferrallitique argilo sableux fortement dégradés mais très bien drainés et à faible capacité de rétention. Sols profonds et faciles à travailler ;
- Zone de la dépression de Tchi où l'on rencontre des vertisols noirs très argileux profonds et très humid

Topography: (max 50 words)

L'ensemble du département est situé sur un plateau

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

Selon les données de l'INSAE (EMICOV-2007, environ 74% de la population dépensent moins d'un dollar US par jour par personne et la part du 5ème le plus pauvre dans la consommation totale est de 8,1%.

Main income sources: (max 50 words)

Le métayage,

L'emprunt.

Short description of the best practice

max 250 words

Renforcer les capacités de planification et d'organisation de façon autonome des populations dans la mise en œuvre d'une exploitation écologiquement durable et socialement adaptée des ressources naturelles et l'application de réglementation pour l'exploitation des ressources naturelles au moyen des structures villageoises/inter villageoises et communales

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

No answer provided

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- Mitigation
 - Adaptation
 - Rehabilitation
-

Main problems addressed by the best practice

(max 50 words)

- Dégradation des terres;
 - Baisse des rendement;
 - baisse des revenus des paysans
-

Outline specific land degradation problems addressed by the best practice

max 100 words

Les mauvaises pratiques agricoles et l'utilisation abusive des pesticides ont conduit à un appauvrissement

des terres et de tous ces corrolaires.

Specify the objectives of the best practice

(max 50 words)

- **Renforcer les capacités de planification et d'organisation de façon autonome des populations dans la mise en œuvre d'une exploitation écologiquement durable et socialement adaptée des ressources naturelles et l'application de réglementation pour l'exploitation des ressources naturelles au moyen des structures villageoises/inter villageoises et communales**
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- **appuyer les communautés à élaborer des Plans de Gestion de leurs Terroirs (PGT) à l'aide des diagnostics systémiques participatifs;**
- **appuyer l'élaboration des schémas directeurs d'aménagement ;**
- **appuyer la mise en œuvre des actions contenues dans les Plans de Gestion des Terroirs (PGT).**

Objective 2

(max 50 words)

No answer provided

Objective 3

(max 50 words)

No answer provided

Objective 4

(max 50 words)

No answer provided

Short description of the technology

max 250 words

La pratique de jachère améliorée de Cajanus Cajan consiste à mettre en terre des graines de Cajanus cajan après le travail des sols, faire un ou deux sarclages. Au cours de son développement, l'arbuste crée d'ombrage, étouffe les mauvaises herbes, perd les feuilles qui servent de mulch. Après fructification et récolte, les arbustes sont coupés et laissés pour être décomposés au sol. Les branchages sont récupérés pour servir de bois de feu dans les ménages. Les feuilles qui servent de mulch conservent l'humidité et se transforment en engrais vert qui renforce le niveau de fertilité des sols. Après cette campagne, le Cajanus cajan est remplacé par la culture de maïs. On note une amélioration du rendement du maïs.

Technical specifications of the technology - if any

max 250 words

Semis de graines de Cajanus cajan dans des poquets distants l'un de l'autre de 40 à 50 centimètres, distance entre deux lignes de poquets : 0,60 mètre

Sarclage : 1 ou 2 fois.

Ouverture de bande de pare-feu autour du champ pour éviter le brûlis de la biomasse par les feux tardifs.

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

GRAIB-ONG,

Address

BP 66-Azové, E-mail : graibong@yahoo.fr

Was the technology developed in partnership?

Yes

If yes, list the partners:

- **IAMD, APIC-ONG, Alpha & Oméga.**

Specify the framework within which the technology was promoted

- **Local initiative**
- **National initiative – non-government-led**

Other (specify) (max 30 words)

No answer provided

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- **1. Les Producteurs agricoles**
- **2. INRAB**

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

Les rôles des parties prenantes dans la mise en œuvre de la technologie sont l'appui-conseil, expérimentation, l'animation et l'encadrement technique pour la vulgarisation de la technologie.

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- **Participatory approaches**

Other (specify) (max 30 words)

No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- **1. To improve the living conditions of affected population**
- **2. To improve the conditions of affected ecosystems**

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

- **1. Amélioration des rendements des cultures.**

2. (max 50 words)

2. Le rendement du maïs à la deuxième campagne est passé de 0,65 Tonnes à 1,2 Tonnes (Enquête de terrain auprès des producteurs)

Socio-economic level (including cultural level):

1. (max 50 words)

1. Amélioration des revenus des ménages

2. (max 50 words)

2. En période de soudure, les ménages disposent de maïs qu'ils vendent et achètent d'autres biens tels que les matériaux de construction et autres biens pour le ménage.

Environmental level:

1. (max 50 words)

1. Protection des terres contre l'érosion hydrique et éolienne.

2. (max 50 words)

2. La vitesse de l'eau de ruissellement est réduite par le mulch et la croûte de battance ne se forme plus. Ainsi l'érosion hydrique est réduite. Les arbustes empêchent le soulèvement des sables.

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

Flétrissement des plants de maïs ;

2. (max 50 words)

Faible rendement des cultures de maïs et de niébé.

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

La jachère améliorée de *Cajanus cajan* étant par essence une pratique d'amélioration du niveau de fertilité des sols à partir des arbustes, elle contribue à double titre à la réduction de la pression sur les forêts ou savanes arborées car les bois récupérés après récolte sont utilisés comme bois de feu dans les ménages.

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

Yes

Explain the reasons:

max 250 words

La pratique de la jachère améliorée de *Cajanus cajan* crée une savane arbustive qui a une capacité de séquestration de carbone et d'azote. Cette fonction atténue le réchauffement climatique et améliore le niveau de fertilité des sols.

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

La production de biomasse par le *Cajanus cajan* est un atout pour la conservation d'humidité dans le sol qui permet de mettre en place des cultures même si la rupture des pluies se prolonge. Cette humidité facilite la survie des plants avec l'appui des matières organiques dont bénéficie le sol.

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising
 - DLDD and SLM monitoring and assessment/research
 - Knowledge management and decision support
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Départements de l'Atlantique et du Zou/Collines
-

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
 - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
 - Fiscal incentives (for example, exemption from or reduction of taxes, duties, fees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

 **Simplicité de la technologie ;**

2. (max 50 words)

 **Effet immédiat de la technologie et pratique endogène ;**

3. (max 50 words)

 Production de plusieurs valeurs ajoutées.

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
 - Sub-national
 - National
 - Subregional
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- 1. Beaucoup de producteurs adoptent facilement la technologie et sa mise en œuvre ne nécessite pas beaucoup de main d'œuvre
-

Related to financial aspects

(max 50 words)

- 1. La technologie ne nécessite pas de moyens financiers qui pourraient empêcher sa mise en œuvre par beaucoup de producteurs.
-

Related to technical aspects

(max 50 words)

- 1. Technologie facilement transposable/reproductible.

Best Practice #4 — Billonnage suivant les courbes de niveau : Ados végétalisé (Technologie vulgarisé par le Projet de Gestion des Terroirs et ressources Naturelles (PGTRN))

- Grazing land
- Unproductive land

Other (specify) (max 30 words)

No answer provided

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Dans les Collines, le climat est soudano-guinéen à deux (02) saisons pluvieuses avec des aléas. Le nombre total normal de jours de pluies dans l'année varie entre 80 et 110. Les pluies sont inégalement réparties. Les régions des collines bénéficient de l'influence maritime.

Soil: (max 50 words)

Les sols sont de type ferrugineux tropical sur un socle cristallin aux caractéristiques très variables. Aussi rencontre t-on les sols noirs et hydro morphes dans les vallées des fleuves et des rivières.

Topography: (max 50 words)

Zone assez homogène couvrant une pénéplaine modelé sur un socle Précambien et dominée par des collines de 300 mètres en moyenne d'altitude

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

57,3% de la population dépensent moins d'un dollar par jour et la part du 5ème le plus pauvre dans la consommation est 8,6%.

Main income sources: (max 50 words)

Les principales activités des populations se résument essentiellement à l'agriculture (68%) suivi du commerce (15%). L'organisation de l'espace reflète une forte emprise humaine sur les sols. La culture sur billons souvent pratiquée est un système qui permet d'enregistrer de très bonnes récoltes de maïs, manioc, d'arachide, d'igname et des fruits.

Le commerce de détails repose surtout sur la distribution de denrées alimentaires, de produits d'exportation tels que les graines d'acajou et de pimen

Land tenure and land use rights: (max 50 words)

Régime de propriété

Don ;

Héritage ;

Achat

Droits d'usage

Métayage.

Short description of the best practice

max 250 words

La technologie mise en place pour lutter contre l'érosion hydrique consiste en la confection des billons perpendiculairement à la pente et leur végétalisation. Cette végétalisation consiste à fixer les ados avec des plantes ou avec des herbacés. Mise à part la fonction de réduction de l'effet érosif de l'eau que jouent les billons, les plantes jouent le rôle de fixation de l'azote de l'air qui est absorbé par le sol en vue de l'amélioration du niveau de fertilité des sols.

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

Pratique endogène de labour ;

Effet immédiat de la technologie et

Le nombre de personnes qui pratiquent la technologie.

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- Prevention
- Mitigation
- Adaptation

Main problems addressed by the best practice

(max 50 words)

- le maintien de la fertilité des sols et la gestion durable des terres ;
- la lutte contre l'érosion, la pauvreté et de l'instauration d'une sécurité alimentaire durable

Outline specific land degradation problems addressed by the best practice

max 100 words

-  le maintien de la fertilité des sols et la gestion durable des terres ;
 -  la lutte contre l'érosion, la pauvreté et de l'instauration d'une sécurité alimentaire durable
-

Specify the objectives of the best practice

(max 50 words)

- **1- Assurer une technologie de restauration de fertilité des sols facilement reproductible par les producteurs ;**
 - **2- Créer les conditions optimales pour faciliter la réalisation d'actions concrètes visant la préservation et l'amélioration de la productivité des terres.**
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- **1. Animer des séances d'information et de sensibilisation au profit des producteurs, Renforcer les capacités des producteurs, accompagner les producteurs dans la production des plantes ayant les capacités de fixation des ados.**

Objective 2

(max 50 words)

- **Renforcer les capacités des producteurs, créer les cadres de concertation entre structures d'encadrement technique des producteurs, faire l'appui- conseil.**

Objective 3

(max 50 words)

No answer provided

Objective 4

(max 50 words)

No answer provided

Short description of the technology

max 250 words

La technologie mise en place pour lutter contre l'érosion hydrique consiste en la confection des billons perpendiculairement à la pente et leur végétalisation. Cette végétalisation consiste à fixer les ados avec des plantes ou avec des herbacés. Mise à part la fonction de réduction de l'effet érosif de l'eau que jouent les billons, les plantes jouent le rôle de fixation de l'azote de l'air qui est absorbé par le sol en vue de l'amélioration du niveau de fertilité des sols.

Technical specifications of the technology - if any

max 250 words

Les billons sont confectionnés suivant les courbes de niveau. Les billons ont une largeur d'environ de 0,40 mètre et une hauteur de 60 à 80 centimètres. Ces billons sont fixés par les arbustes (*Gliricidia sepium*) ou des herbacés (*Vetiveria sp.*). La distance entre les billons varie selon la pente

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

Projet de Gestion des Terroirs et Ressources Naturelles (PGTRN)

Address

No answer provided

Was the technology developed in partnership?

Yes

If yes, list the partners:

- 1. GRAIB-ONG
- 2. MGE-Conseils
- 3. APIC-ONG
- 4. Alpha & Omega-Environnement

Specify the framework within which the technology was promoted

- Local initiative
- National initiative – government-led
- Programme/project-based initiative

Other (specify) (max 30 words)

No answer provided

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- 1. Les Populations des villages demandeurs
- 2. GRAIB-ONG
- 3. MGE-Conseils
- 4. APIC-ONG
- 5. Alpha & Omega-Environnement.

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

Les rôles des parties prenantes dans la mise en œuvre de la technologie sont l'appui-conseil, expérimentation, l'animation et l'encadrement technique pour la vulgarisation de la technologie.

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- Participatory approaches

Other (specify) (max 30 words)

No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population

- 2. To improve the conditions of affected ecosystems
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

1. Amélioration des rendements des cultures.

2. (max 50 words)

2. Le rendement des cultures s'est amélioré de manière substantielle (Enquête de terrain auprès des producteurs)

Socio-economic level (including cultural level):

1. (max 50 words)

1. Amélioration des revenus des ménages

2. (max 50 words)

2. En période de soudure, les ménages disposent de maïs qu'ils vendent et achètent d'autres biens tels que les matériaux de construction et autres biens pour le ménage.

Environmental level:

1. (max 50 words)

1. Protection des terres contre l'érosion hydrique.

2. (max 50 words)

2. La vitesse de l'eau de ruissellement est réduite par les ados végétalisés.

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

Néant

2. (max 50 words)

Néant

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

La technologie qui consiste à confectionner les ados végétalisés réduit la vitesse de l'eau de ruissellement, le décapage des terres qu'elle déverse dans les cours d'eau. Ainsi, la technologie renforce l'infiltration de l'eau dans le sol, réduit le comblement des cours d'eau qui constitue un écosystème fragile.

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

No

Explain the reasons:

max 250 words

No answer provided

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

Le pouvoir de conservation de l'eau dans le sol est un facteur important pour la survie des cultures lorsque une rupture des pluies s'installe. Aussi faut-il souligner que la séquestration de l'azote par le *Gliricidia* sp est un atout pour cette technologie car l'azote est un oligo-élément pour les cultures.

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising
 - Knowledge management and decision support
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Dans l'Atlantique et le Couffo où la pratique de billonnage n'est pas répandue.
-

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
 - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
 - Fiscal incentives (for example, exemption from or reduction of taxes, duties, fees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

- Pratique de billonnage existe dans les pratiques culturelles ;

2. (max 50 words)

- Ne nécessite pas de grands moyens financiers ;

3. (max 50 words)

- Existence de structures d'encadrement ;
 - Effet immédiat et palpable.
-

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
 - Sub-national
 - National
 - Subregional
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- 1. Technologie nécessitant de main d'œuvre importante et de ressources humaines bien formées à la technologie.
-

Related to financial aspects

(max 50 words)

- 1. Les moyens financiers à mobiliser pour la mise en œuvre de la technologie sont négligeables et favorisent la reproductibilité de la technologie.
-

Related to technical aspects

(max 50 words)

- 1. La confection des billons est faite avec des outils (triangle A) et le triangle à pente peuvent être confectionnés localement et facilement maîtrisable par les producteurs.
