Performance Indicators

C. Performance indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Affected country Parties are requested to report on the following fourteen performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by affected country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Number and size of information events organized on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.

Understanding of the indicator

At the national and local level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by affected country Parties by reporting on Convention-related communication strategies at subregional, regional and global level.

Data needed

Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity.

Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.).

Events organized and media produced by the UNCCD NFP or organized/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.

Data sources (indicative only)

International and national media (newspapers) advertising the events at national and local level, the Internet, the organizers of the events, programmes/projects' final reports.

Check the glossary for

'NFP', 'ICT', 'Information events', 'Media products', 'STIs', 'CSOs'

Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).

Overall target

By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity

Number of information events

Year	Number of information events	Estimated number of participants in the information events
2008	152	200

National contribution to the target

On the basis of the information you have provided above, estimate the proportion (%) of the population in your country which is informed about DLDD and DLDD synergies with climate change and biodiversity at the time of reporting?

Estimated share of total country population =

25 %

Qualitative assessment

Is the information you have provided on communication processes part of a national communication strategy addressing environmental issues?

Yes

Performance indicator CONS-O-3 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3

Number of CSOs and science and technology institutions participating in the Convention processes.

Understanding of the indicator

At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

Data needed

The specification of the organizations involved in the programmes/projects as reported in the PPSs.

Data sources (indicative only)

PPSs submitted to the UNCCD as part of the reporting exercise.

Check the glossary for

'STIs', 'CSOs', 'PPS', 'Convention processes'

Overall target

A steady growth in the participation of CSOs and science and technology institutions in the Convention processes is recorded along the implementation period of The Strategy.

In the PPSs you have specified the number of CSOs and the number of STIs involved in each programme/project. Add these numbers and give the totals by year in the table below.

Year	Number of CSOs involved in DLDD-related programmes/projects	Number of STIs involved in DLDD-related programmes/projects
2008	35	10
2009	35	10
2010		
2011		
2012		
2013		
2014		
2015		
2016		
2017		
2018

Programme and project sheets (PPSs) submitted to UNCCD

No answer required

National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the participation of CSOs and STIs in DLDD-related programmes and projects?

Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of the participation of CSOs and STIs to DLDD-related programmes/projects. (tick as many boxes as necessary and rate the level of importance)

		Not important	Important	Very important
X	Increased networking and collaboration opportunities	X		
X	Increased access to information and to national and/or international financing opportunities	X		
X	Increased willingness of the government in working with CSOs		X	
X	Increased interest of donors in working with CSOs	X		
X	Strengthened organizational, project management and fund-raising capacity of CSOs		X	
X	Increased funding opportunities requiring partnership with the STIs	X		
	Strengthened organizational, project management and fund-raising capacity of the STIs			
	Other			

Other (specify) (max 30 words)

le contexte socio-politique actuel n'est pas favorable à une augmentation des opportunités

Reasons for decreasing for CSOs

		Not important	Important	Very important
X	Costly participatory processes			X
X	Low organizational, fund-raising and project management capacity of CSOs		X	
X	Government policies and/or the legal environment do not foster the engagement of CSOs			X
X	Diminishing funding			X
X	Other			

Other (specify) (max 30 words)

Depuis 2007 le pays fait face à des revendications sociales entraînant des troubles et des destructions ; toute chose qui n'encourage aucun partenaire au développement bi ou multilatéral de s'investir.

Reasons for decreasing for STIs

		Not important	Important	Very important
X	DLDD topics are not prioritized by national STIs	X		
X	Low organizational, fund-raising and project management capacity of STIs		X	

X	Decreased networking opportunities at national and international level	X	
X	Diminishing funding		X
X	Other		

Other (specify) (max 30 words)

La crise internationale financière accentuée par la situation particulière du pays a occasionné une baisse considérable des opportunités d'intervention.

Performance indicator CONS-O-4 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-4 for Outcome 1.3

Number and type of DLDD-related initiatives of CSOs and science and technology institutions in the field of education.

Understanding of the indicator

The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on "education" because "awareness" and "advocacy" are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level.

Data needed

Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula.

Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.

Data sources (indicative only)

CSOs and STIs operating in the country.

Check the glossary for

'CSOs', 'STIs', 'NFP', 'Formal education', 'Non-formal education'.

Overall target

A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and science and technology institutions is recorded along the implementation period of The Strategy

Number of DLDD-related initiatives undertaken

Year	Number of DLDD-related initiatives undertaken by CSOs formal education	Number of DLDD-related initiatives undertaken by CSOs non-formal education	Number of DLDD-related initiatives undertaken by STIs formal education	Number of DLDD-related initiatives undertaken by STIs non-formal education

National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the delivery of DLDD-related initiatives in the education sector by CSOs and STIs?

Yes

Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of DLDD-related education initiatives undertaken by CSOs and STIs.

(tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very important
X Increased access to funding	X		
X Increased awareness of DLDD-related problems and of the need for action		X	
X Increased knowledge of DLDD-related topics and enhanced skills of trainers/teachers		X	
X Government policies are more supportive of education initiatives	X		
X International donors are more supportive of education-focussed initiatives.	X		
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for CSOs

	Not important	Important	Very important

X	Lack of financial resources			X
X	Insufficient awareness and knowledge by national CSOs of DLDD-related issues		X	
X	Limited capillary presence of national CSOs at the grass-root level			X
	Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for STIs

		Not important	Important	Very important
X	Lack of financial resources			X
X	National STIs are more focussed on research activities than on education and training			X
	Other			

Other (specify) (max 30 words)

La recherche scientifique figure parmi les priorités mais n'est pas financé conséquemment à cause des difficultés financières que traverse le pays.

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Number of affected country Parties, subregional and regional entities to have finalized the formulation/revision of NAPs/SRAPs/RAPs aligned to The Strategy, taking into account biophysical and socio-economic information, national planning and policies, and integration into investment frameworks.

Understanding of the indicator

At the national level, the indicator measures the performance of affected country Parties in formulating or revising their NAPs in alignment with The Strategy. While providing information on this process, the indicator also outlines whether: (a) the analysis of DLDD drivers, barriers to possible solutions, and measures that may eventually overcome these barriers, has been carried out; (b) the alignment process has been supported by biophysical and socio-economic baseline information; (c) the action programmes have been included in integrated investment frameworks; and (d) the action programmes have been integrated with other existing national plans and policies. The indicator will inform on the extent to which Parties have responded to decision 3/COP.8, paragraph 45, and on the feasibility of assessing the progress of The Strategy over its implementation period (2008–2018). Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on formulation or revision of SRAPs and RAPs in alignment with The Strategy.

Data needed

UNCCD NAP. Only a NAP formally approved by the relevant governmental authorities is to be considered as 'finalized'. Other relevant planning documents.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'Finalized', 'NAP', 'NFP', 'driver', 'barrier', 'integrated investment framework', 'baseline'

Overall target

By 2014, at least 80 per cent of affected country Parties, subregional and regional entities have formulated/revise a NAP/SRAP/RAP aligned to The Strategy.

NAP Adoption and Revision

Had your country already adopted a NAP prior to The Strategy?

No

If yes, has your country revised the NAP in alignment with The Strategy?

No answer provided

If you have revised the NAP in alignment with The Strategy, specify the date of its approval.

No answer provided

If you have not revised the NAP in alignment with The Strategy, specify why the process was not initiated. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very Important
Not a priority for the government			
Lack of capacities			
Lack of financial resources			

Understaffing			
Lack of time			
Poor internal coordination among relevant ministries

Poor internal coordination among relevant ministries			
Other			

Other (specify) (max 30 words)

No answer provided

The questions below apply only to those countries having a NAP aligned to The Strategy

If you have a NAP, is it supported by biophysical and socio-economic baseline information?

No answer provided

If you have a NAP, does it assess DLDD drivers?

No answer provided

If you have a NAP, does it assess the barriers to sustainable land management?

Yes

If yes, does the NAP include recommendations to remove these barriers?

Yes

If you have a NAP, has it been included into an integrated investment framework?

No

If you have a NAP, has it been integrated into national development planning and relevant sectoral and investment plans and policies?

No

If yes, has the NAP been integrated into your country's Poverty Reduction Strategy Paper?

No answer provided

Did you refer to the Guidelines on the alignment of action programmes with The Strategy as proposed in ICCD/COP(9)/2/Add.1 while developing or reviewing your action plan?

No

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

- 1. Coordination RCLI-LCD
- 2. Coordonnation PAN/LCD-Guinea

Attachments:

National contribution to the target

If you do not have an approved NAP aligned to The Strategy at the time of reporting, when do you plan to have it developed and approved?

2012-13

Qualitative assessment

Has the formulation and/or alignment of the NAP been supported by external assistance?

No answer provided

If yes, did you receive assistance from one or more of the following institutions? (more than one box can be ticked)

No answer provided

If yes, which type of assistance did you receive?

No answer provided

Identify the major difficulties experienced in the formulation/alignment process (tick as many boxes as necessary and rate the level of importance).

	Not important	Important	Very Important
Not a priority for the government			
Poor availability of biophysical and socio- economic baseline information			
Existing investment frameworks are not fully compatible with the NAP			
Streamlining the NAP into existing plans and policies is too time-consuming			
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-7 for Outcome 2.5

Operational Objective 2: Policy framework

Performance indicator CONS-O-7 for Outcome 2.5

Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator

The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place at the national level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. This information will be complemented by the reporting of other reporting entities on synergistic processes at the subregional, regional and global level.

Data needed

Planning/programming documents and legislative/regulatory documents.

Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

“Joint planning/programming initiatives”, “Operational mechanisms for joint implementation or mutual reinforcement”

For an indicative list of activities by Parties to promote synergies among the Rio Conventions, refer to [target=' blank>UNEP/CBD /COP/DC/IX/16, Annex II](#)

Overall target

By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions

Are you implementing joint planning/programming initiatives for the three Rio Conventions?

No

If yes, specify the type of joint initiative(s) (tick as many boxes as necessary)

No answer provided

Other (specify) (max 30 words)

No answer provided

Do operational mechanisms for joint implementation or mutual reinforcement exist in your country?

No

If yes, specify the type of mechanism(s) (tick as many boxes as necessary)

No answer provided

Other (specify) (max 30 words)

No answer provided

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional /regional monitoring system for DLDD.

Understanding of the indicator

At the national level, the indicator measures the monitoring potential of the country by quantifying the number of monitoring systems established and supported. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties during the implementation of The Strategy and beyond. This information will be complemented by the reporting of other reporting entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.

Data needed

Information on monitoring systems established within the national Ministries or other bodies/institutions.

Programmes/projects' documents, fiches and summary sheets, programmes/projects' interim or final reports.

Only those monitoring systems storing all or most of the information needed for reporting to the UNCCD shall be considered.

Data sources (indicative only)

Relevant national ministries, programme/project management units, other non-governmental initiatives.

Check the glossary for

'monitoring system', 'vulnerability'

Overall target

By 2018, at least 60 per cent of affected country Parties, subregional and regional reporting entities have established and supported national monitoring systems for DLDD

Is a monitoring system for DLDD established at the national level?

No

If yes, specify whether this system is: Functional

No answer provided

If yes, specify whether this system is: Regularly Updated

No answer provided

If no DLDD-specific monitoring system is in place, is an environmental monitoring system partially covering DLDD established at the national level?

No

List any monitoring system available at the sub- national level that can contribute to the UNCCD reporting (add as many rows as necessary).

- **Téledétection:AGRYHMET/Niamey et Centre Suivi Ecologique/Dakar**

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Number of affected country Parties, subregional and regional entities reporting to the Convention along revised reporting guidelines on the basis of agreed indicators

Understanding of the indicator

The indicator measures the use of biophysical and socio-economic information at the national level in defining a commonly agreed core set of impact indicators for the UNCCD and in monitoring progress against these indicators using harmonized methodologies.

The indicator will inform to what extent it is possible to compile a comparable and global assessment of UNCCD impact.

Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the use of impact indicators at the subregional and regional levels, if and when impact indicators for these levels will be commonly agreed upon by the Conference of the Parties.

Data needed

Reports to the UNCCD by affected country Parties in 2012 and 2016.

The information to report on this indicator will be compiled by affected country Parties every four years when reporting on the strategic objectives that require biophysical and socio-economic information (i.e. SO1, SO2 and SO3). Reporting on this indicator is due in 2012 and in 2016 only.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'NFP'

Overall target

By 2018, at least 90 per cent of affected country Parties, subregional and regional reporting entities report to the Convention in compliance with the new reporting guidelines.

Has your country reported on the two impact indicators considered by decision 13/COP.9 to be the minimum reporting requirement?

No answer required for this indicator in the 2010 reporting cycle

Number of impact indicators for strategic objectives 1, 2 and 3 your country has reported on in 2012 and 2016

2012

No answer required for this indicator in the 2010 reporting cycle

2016

No answer required for this indicator in the 2010 reporting cycle

While reporting on impact indicators, did you refer to the reporting guidelines, i.e. using the common baselines and methodologies defined by the CST?

No answer required for this indicator in the 2010 reporting cycle

Sources of information

Specify the sources used to extract the information provided above (add as many rows information as necessary). If reporting online, you may also upload relevant documents.

No answer required for this indicator in the 2010 reporting cycle

National contribution to the target

If in 2012 your country has not reported on some or all of the impact indicators for the UNCCD, when do you plan to do so?

No answer required for this indicator in the 2010 reporting cycle

If in 2012 your country has not complied with the reporting guidelines, i.e. using the common baselines and methodologies defined by the CST, when do you plan to do so?

No answer required for this indicator in the 2010 reporting cycle

Qualitative assessment

Identify the major difficulties experienced in reporting against the impact indicators:

No answer required for this indicator in the 2010 reporting cycle

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Number of revised NAPs/SRAPs/RAPs reflecting knowledge of DLDD drivers and their interactions, and of the interaction of DLDD with climate change and biodiversity.

Understanding of the indicator

The indicator measures knowledge-transfer processes from the theoretical to the operational level. This is done through an assessment carried out by affected country Parties (self-assessment) of the levels of traditional and scientific knowledge reflected in their NAPs. The assumption is that NAPs based on sound scientific and traditional knowledge will propose more significant and effective strategies and activities for implementation at the national level, and will, ultimately, perform better than those NAPs that do not take into account available knowledge on DLDD and DLDD synergies. The indicator will inform to what extent UNCCD implementation is likely to achieve meaningful results. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the assessment of their SRAPs and RAPs.

Data needed

NAP aligned to The Strategy.

Scientific literature consulted for the development of the NAP.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'NAP', 'NFP', 'driver'

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

Overall target

By 2018, at least 70 per cent of revised NAPs/SRAPs/RAPs have successfully gone through a quality self-assessment.

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

In your NAP, is the identification of biophysical and socio-economic drivers, and of their interaction, knowledge-based?

Yes

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

- **Scientific literature**
- **Expert knowledge**
- **Traditional knowledge**

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If

reporting online, you may also upload relevant documents.

- 2007 MP Document de stratégie de réduction de la pauvreté
2007 UE Profil environnemental Guinée
2007 ME/DNEF Rapport annuel d'activités 2006
2007 MTPUH Plan d'Actions 2007 – 2010
2007 MAEEF Nouvelle Lettre de Politique de Développement Agricole
2006 ME/PNUD Projet Plan d'action National d'Adaptation
 - [Littérature scientifique] 3
[Connaissances d'expert] 2
[Connaissances traditionnelles] 1
- NB: Plus le chiffre est grand plus la prise en compte de l'activité est importante**

In your NAP, is the analysis of the interaction between drought mitigation and restoration of degraded land and climate change mitigation/ adaptation or biodiversity conservation knowledge-based?

Yes

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

- Scientific literature
- Expert knowledge
- Traditional knowledge

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If reporting online, you may also upload relevant documents.

- 2002 MMGE/ FEM/PNUD Communication initiale de la Guinée à la Convention cadre des Nations Unies sur le Changements Climatiques
2006 ME/PNUD Projet Plan d'action National d'Adaptation aux Changements Climatiques (PANA-CC).

Performance indicator CONS-O-11 for Outcome 3.5

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-11 for Outcome 3.5

Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator

The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Data needed

Information from websites.

Only DLDD-relevant knowledge-sharing systems and networks shall be considered.

Data sources (indicative only)

Relevant organizations at the national level, relevant national ministries hosting knowledge-sharing systems and networks within their websites.

Check the glossary for

'knowledge-sharing system', 'PRAIS'

List any DLDD-relevant 'knowledge-sharing system' at the country level you are aware of, providing an Internet link and estimated number of users per year (add as many rows as necessary)

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments

Understanding of the indicator

At the national level the indicator measures the presence of capacity-building processes through the quantification of existing major capacity-building initiatives. The indicator will inform to what extent affected country Parties may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). This information will be complemented by the reporting of other reporting entities on existing UNCCD-related capacity-building initiatives at the subregional, regional and global level.

Data needed

Information on DLDD-related capacity building initiatives.

Only major capacity-building plans/programmes/projects mentioned in the PPSs are to be considered.

Data sources (indicative only)

PPSs submitted to UNCCD as part of the reporting exercise

Programmes/projects' documents, fiches and summary sheets, interim or final reports of those programmes and projects identified through the PPSs as having DLDD-related capacity-building as a major objective.

Check the glossary for

'NCSA', 'PPS'

Overall target

By 2014, at least 90 per cent of affected country Parties, sub-regional and regional reporting entities implement DLDD specific capacity building plans or programs or projects.

Number of DLDD-related capacity building initiatives undertaken

Identify, if any, relevant programmes and projects through the PPSs and check corresponding programmes/projects' documents, fiches and summary sheets, and interim or final reports, to extract the information needed for completing the table below

Year	NCSA-generated	Other initiatives
2008	1	
2009	1

If at the time of reporting there are no DLDD-specific capacity building plans, programmes or projects implemented in your country, when do you plan to have something in place?

2012-13

Qualitative assessment

Have you received assistance from one or more of the following institutions to build capacities to combat DLDD? (more than one box can be ticked)

- **GEF**
- **Multilateral (UN agencies, IGOs, international financing institutions, etc.)**

If yes, which type of assistance have you received?

- **Technical support**
- **Financial support**

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, reflect leveraging national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator

At the national level, the indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating desertification and land degradation, through the quantification of investment frameworks developed by country Parties within the IFS devised by the GM or other integrated financing strategies promoted by diverse international institutions. This information will be complemented by the reporting of other reporting entities on the establishment of integrated investment frameworks at national, subregional and regional level.

Data needed

Investment frameworks documents.

Only investment frameworks prepared along the guidelines devised within integrated financing strategies shall be considered.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

'IFS', 'NAP' 'leveraging', 'integrated investment framework'

Overall target

By 2014, at least 50 per cent of affected country Parties, subregional and regional entities have developed integrated investment frameworks.

Has your country developed an integrated investment framework?

No

If yes, specify when it was developed.

No answer provided

The questions below apply only to those countries which have an integrated investment framework.

Is your integrated investment framework based on the NAP?

No answer provided

If based on the NAP, who assisted in its development?

No answer provided

2012-13

Qualitative assessment

Identify the major difficulties experienced in developing an integrated investment framework (tick as many boxes as necessary and rate the level of importance).

	Not important	Important	Very Important
Financial constraints			
Human resources constraints			
Lack of coordination among relevant ministries and unclear attribution of responsibilities			
Lack of coordination among those providing support			
National, bilateral and multilateral resources are too diverse; cannot be realistically coordinated under one umbrella.			
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-16 for Outcome 5.2

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-16 for Outcome 5.2

Degree of adequacy, timeliness and predictability of financial resources made available by developed country Parties to combat DLDD.

Understanding of the indicator

This is a qualitative indicator requiring the perception-based assessment by developing affected country Parties of the adequacy, timeliness and predictability of bilateral contributions received from developed country Parties for the implementation of the Convention. "Adequate", "timely" and "predictable" resources are frequently referred to in The Strategy as being necessary to ensure proper planning and effective implementation. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on their perception-based assessments.

Data needed

-

Data sources (indicative only)

-

Check the glossary for

-

Only affected country Parties entitled to receive assistance under the UNCCD are requested to report on this indicator.

Overall target

No target has been set for this indicator

How would you rate the bilateral assistance received within the framework of UNCCD for the implementation of The Strategy and of the Convention?

Adequacy of bilateral assistance

Not adequate

Timeliness of bilateral assistance

Fairly timely

Predictability of bilateral assistance

Not predictable

Provide narrative justification on your above rating (max 100 words)

L'aide est le plus souvent en dessous de la demande exprimée. Les difficultés de décaissement occasionnent souvent des retards dans l'exécution des activités. L'instabilité institutionnelle fait que les assistances sont circonstancielles et conjoncturelles.

Qualitative assessment

Did you receive assistance in raising resources from bilateral donors?

Yes

If yes, from whom? (more than one box can be ticked)

- secretariat
- GM
- GEF
- Multilateral (UN agencies, IGOs, international financing institutions, etc.)

Other (specify) (max 30 words)

No answer provided

Has the level of adequacy, timeliness and predictability of bilateral assistance constrained your country's performance in planning and implementation with respect to UNCCD?

No answer provided

Performance indicator CONS-O-17 for Outcome 5.3

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-17 for Outcome 5.3

Number of DLDD-related project proposals successfully submitted for financing to international financial institutions, facilities and funds, including the GEF.

Understanding of the indicator

The indicator measures the capacity of fund-raising at the national level, through the quantification of project proposals successfully submitted for funding to the various financing organizations. The indicator will inform to what extent affected country Parties make increasing efforts to mobilize resources. This information will be complemented by the reporting of other reporting entities on the fund-raising efforts at national, subregional and regional level.

Data needed

Information contained in the PPSs and SFAs submitted to UNCCD.

Data sources (indicative only)

PPSs and SFAs submitted to UNCCD as part of the reporting exercise.

The PPS requires specification of the project 'status' thus it allows the identification of relevant projects to be considered by this indicator and the monitoring of their approval status.

The SFA requires the specification of amounts committed to approved projects.

Check the glossary for

'PPS', 'SFA', 'Project proposals', 'currency', 'Successfully submitted proposals'

Overall target

A steady growth in the number of DLDD-related successfully submitted project proposals is recorded along the implementation period of The Strategy.

Number of project proposals submitted (pipeline) and ongoing, by biennium

Biennium	submitted (pipeline)	ongoing
2008-2009	1	5
2010-2011		
2012-2013		
2014-2015		
2016-2017		

Amount of funds raised, by biennium

You can find the amount of funds raised for the ongoing projects in the corresponding SFAs. Sum these amounts and give the total in the below table.

Biennium	Total amount
2008-2009	USD2518500
2010-2011	
2012-2013	
2014-2015	
2016-2017	

Sources of information

Specify the sources used to extract the information provided above: Programme and Project Sheets and Standard Financial Annexes

No answer required

National contribution to the target

According to the information provided above, do you think that you are mobilizing enough resources from international financial institutions, facilities and funds through successfully submitted project proposals?

No

If no, do you plan to increase the country's efforts in presenting project proposals to international financial institutions, facilities and funds?

Yes

Qualitative assessment

Identify the reasons for the increasing or decreasing trend of project proposals successfully submitted to international financial institutions, facilities and funds (tick as many boxes as necessary and rate the level of importance).

Reasons for increasing

	Not important	Important	Very Important
Easier and more transparent application procedures			
Increased capacities of national stakeholders to prepare applications			
Major natural hazards occurred at the national level considerably increased the level of resources made available by the international community			
Access to funding is increasingly facilitated by third parties such as the private sector			
Existence of a financing strategy (IFS or others)			
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing

	Not important	Important	Very Important
X Financing opportunities are not publicised enough, lack of access to necessary information			X
X Complicated application procedures, the level of complexity being worsened by the different requirements of the various donors			X
X Limited financial resources are made available for DLDD-related programmes/projects, and lack of DLDD-specific allocations within donors' portfolio.		X	
X Other		X	

Other (specify) (max 30 words)

Presque tous les projets concernant la dégradation des terres financés dans le cadre de l'aide bilatéral ou par l'UE sont arrêtés depuis décembre 2007 à cause de l'instabilité politique que connaît le pays.

Seuls quelques projets financés par le FEM, et le PNUD sont en exécution.

Performance indicator CONS-O-18 for Outcome 5.5

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-18 for Outcome 5.5

Amount of financial resources and type of incentives which have enabled access to technology by affected country Parties.

Understanding of the indicator

The indicator measures whether access to technology is facilitated by means of financial resources or economic and policy incentives. The indicator will inform to what extent an enabling environment for technology transfer has been created at the national level and whether sufficient resources are dedicated to technology transfer. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on financial resources and type of incentives which have enabled access to technology at the subregional and regional level.

Data needed

Budgets of relevant programmes and projects

Information on policy/regulatory, financial and fiscal incentives. Incentives facilitating access to technology shall be those established and implemented at the national level, not necessarily within the framework of DLDD-related cooperation.

Data sources (indicative only)

Financial documents of programmes and projects submitted as PPSs to the UNCCD as part of the reporting exercise.

National policy, regulatory and economic/financial documents.

Check the glossary for

'technical support', 'incentive', 'PPS'

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Overall targets

A steady growth in the financial resources allocated to facilitate access to technology by affected country Parties is recorded along the implementation period of The Strategy.

A steady growth in the number of economic and policy incentives reported upon is recorded along the implementation period of The Strategy.

Estimate of amounts allocated to facilitate technology transfer

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Standard Financial Annex

D. Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilized by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimize double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organization, and the funding period, if applicable;

(c) Classification, i.e. categorization of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.

Programme and Project Sheets

E. Programme and Project Sheet

Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.

The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.

A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorized using the Rio Markers for desertification and Relevant Activity Codes (RACs).

Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the UN Convention on Biological Diversity, CBD – and the UN Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.

The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.

Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.

To minimize the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.

In the PPS template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by country Parties and other reporting entities with relevant data or narrative information.

Programme/Project #1 — Projet d'Appui au Développement agricole durable en Guinée Forestière

Title

-

Target Area size / administrative unit

Indicate the total area expressed in number of hectares (numeric field. Do not use abbreviations, symbols or decimals). Also indicate the administrative unit targeted in the project area, if known, by the Programme/Project

Area Size

No answer provided

Administrative Unit

Guinée Forestière

Target Group

Enter the different stakeholders, such as individuals, groups, or organizations, positively affected through their involvement in the implementation of an initiative/project/programme

- **Petits exploitants agricoles, groupements paysans**
-

Beneficiaries

Enter the total number of people benefitting from the Programme/Project, if known (numeric field. Do not use abbreviations, symbols or decimals)

No answer provided

Identification Code

Enter the Programme/Project identification code (ID) or number, given by the relevant extending agency (if applicable)

PRODAD-GF

Status

Indicate the status of the Programme/Project at the time of completing this form.

Ongoing

Start date (dd/mm/yyyy)

Indicate the date at which the Programme/Project started or is due to start, if known (e.g. 15/01/2011)

2004

Completion date (dd/mm/yyyy)

Indicate the date at which the Programme/Project was completed or is due to be completed, if known (e.g. 15/01/2011)

Programme/Project co-financing**Source**

Provide the full name and acronym of all co-financing organisations

No answer provided

Other

FIDA : 12,4945,000 USD

BND 1,870,000 USD

Bénéf: 1,186,000 USD

Currency, Amount

For each co-financing, indicate the currency denomination used (e.g. EUR, USD, YEN, etc.)

Indicate the amount of funding provided by each co-financing organisation (numeric field. Do not use abbreviations, symbols or decimals)

No answer provided

UN Conventions' Rio Markers

Assign the appropriate Rio Marker to the Programme/Project (refer to the Rio Markers guidance note for more information, examples and instructions)

UNCCD

1

UNFCCC adaptation

1

UNFCCC mitigation

1

CBD

1

Strategic objectives

Indicate which strategic objective of the UNCCD 10-Year Strategy is addressed by the Programme/Project

- 1
- 2
- 3

Operational objectives

Indicate which operational objective of the UNCCD 10-Year Strategy is addressed by the Programme/Project

- 1
- 2
- 4
- 5

Programme/Project Objectives

Indicate the objectives pursued by the Programme/Project, as specified in the related documentation, choosing from the list of purpose codes provided in document (add Quick Reference Guide document title and reference code (please see footnotes above). The OECD list of purpose is also available at the following link : http://www.oecd.org/document/21/0,3343,en_2649_34447_1914325_1_1_1_1,00.html.

- 160 OTHER SOCIAL INFRASTRUCTURE AND SERVICES
- 240 BANKING AND FINANCIAL SERVICES
- 311 AGRICULTURE

- 31120 Agricultural development
- 31130 Agricultural land resources
- 31161 Food crop production
- 31166 Agricultural extension
- 31193 Agricultural financial services

Programme/Project Components

Programme/Project Components

Indicate the specific Programme/Project components, if known, as specified in the related documentation.

Note: This information should be taken into account in the computation of performance indicator no.

CONS-O-18.

Aamélioration état nutritionnel et sanitaire des populations.

Renforcer les capacités de la population cible, de leurs organisations et institutions participantes

Améliorer de manière durable la productivité des systèmes de production agricole et diversifier les sources de revenus agricoles et non a

Currency, Amount

Indicate the currency denomination (e.g. EUR, USD, YEN, etc.)

Indicate the amount allocated to each Programme/Project component (numeric field. Do not use abbreviations, symbols or decimals)

15550500 US Dollar

Rio Marker for desertification

Assign the appropriate Rio Marker for desertification to each Programme/Project component (refer to the [Rio Markers guidance note](#) for more information, examples and instructions)

1

Relevant Activity Codes (RACs)

Indicate all the Relevant Activity Codes (RACs) that may apply to the Programme/Project components (refer to the [RACs guidance note](#) for more information, examples and instructions)

- **3 Resource Management**
- **3.1 Production Systems**
- **3.2 Natural Resource Management**
- **3.1.1 Agriculture**
- **3.1.5 Production Support**

Expected or achieved results

Provide information on the results achieved or expected from the implementation of the Programme/Project (max 100 words).

- **Recrutement des cinq opérateurs de gestion de terroirs et un opérateur de micro finance**
Elaboration d'un système de suivi évaluation et de manuel de procédures comptable financière et administrative;
Achat des matériels roulants et informatiques en cours.
Achèvement des infrastructures sociocommunitaires du PDPF
10 Diagnostics Participatifs au niveau des 10 CRD pour fin d'élaboration des PDL;

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

- **Ministère de l'Agriculture**
Ministère du Plan

Additional Information

F. Additional information

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by affected country Parties and consequently to make more targeted and specific recommendations to the COP. It allows affected country Parties to comment or report upon issues that are not covered elsewhere but that are nevertheless of importance at the national level or within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process and on the implementation of NAPs as well as lessons learnt, problems, constraints and bottlenecks faced in terms of human and financial resources. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of affected country Parties within the framework of the Convention, as requested by decision 13/COP.9, paragraph 17.

Reporting process-related issues

Financial resources

Could your country count on sufficient financial resources to meet UNCCD reporting obligations?

No

Provide an estimate of the amount invested from your country's national budget into the UNCCD reporting process.

2017255261 US Dollar

Human resources

How many people were involved in your country in the UNCCD reporting process?

Number of people

No answer provided

Estimate the total number of person/day dedicated by these persons to the UNCCD reporting process:

Number of person/day

No answer provided

Knowledge

Could your country count on sufficient technical and scientific knowledge to meet UNCCD reporting obligations?

No answer provided

Coordination

Was coordination with the relevant implementing agencies satisfactory in order to apply for necessary funds?

Yes

Was coordination at the national level with the relevant line ministries satisfactory in order to comprehensively and coherently report?

No

Participation and consultation

Was a participatory or consultative approach applied to involve all relevant stakeholders in the reporting process?

Yes

Validation meeting

Was a validation meeting held as a tool to integrate stakeholders in the reporting process?

Yes

Subregional and regional processes

Did your country actively contribute to the subregional and regional reporting processes?

Yes

PRAIS portal

If you are reporting online, did you receive sufficient training on access and utilization of the PRAIS portal?

No

Accommodation of specific requests within COP decisions

Report on specific COP requests – iterative process on indicators

Decision 13/COP.9, paragraphs 2, 3 and 24, envisages an iterative process to refine the set of performance indicators provisionally adopted by the same decision. As a tool to implement this iterative process, affected country Parties can provide here their suggestions and recommendations for improvement.

Tick the cells only when you have experienced difficulties in reporting on one, or more, indicator(s). Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.

Reporting on the implementation of NAP

Which is the percentage of activities included in the NAP that are currently implemented?

1-30%

Human resources

Lessons learnt (report on the 2 most important only)

1

Le personnel dédié à la lutte contre les DDTS n'est pas aussi compétent y égard à leur niveau de formation

2

L'effectif déployé sur le terrain dans le cadre de la lutte contre les DDTS est insuffisant.

Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)

1

Faiblesse de capacité

2

Insuffisance de personnel

Financial resources

Lessons learnt (report on the 2 most important only)

1

les moyens mobilisés tant au niveau du budget national de développement qu'au plan multilatéral et bilatéral pour la mise en œuvre des actions de DDTS sont très insuffisants;

2

les procédures de décaissement sont en général complexes.

Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)

1

Faible maîtrise des manuels de décaissements des fonds;

2

Retard dans le paiement des fonds de contrepartie nationale lorsque cela s'avère nécessaire.

Any other country-specific issues

Has your country any specific issue to bring to the attention of the Conference of the Parties?

Yes

If yes, please specify under which of the following broad categories it can be classified.

Category

Policy; legislative; institutional framework

Other (specify) (max 30 words)

No answer provided

Narrative description

Depuis 2008 le pays est confronté à une instabilité socio-politique. Ce qui affecte négativement le bon fonctionnement des institutions en charge de la lutte contre les DDTS.

Le faible niveau de capitalisation des informations sur les résultats des activités de lutte contre les DDTS rend difficile l'obtention de statistique fiable sur les données de base.

Best Practices

G. Best practices

According to decision 13/COP.9, Annex V, UNCCD best practices shall be collected according to seven themes: 1. SLM technologies, including adaptation; 2. Capacity building and awareness raising; 3. DLDD and SLM monitoring and assessment/research; 4. Knowledge management and decision support; 5. Policy, legislative, institutional framework; 6. Funding/resource mobilization; 7. Participation, collaboration and networking.

While themes 2 to 7 represent different elements of the enabling environment needed for the implementation and dissemination/up-scaling of sustainable land management (SLM) technologies (indirect impact), theme 1 comprises all actions on the ground that have a direct impact on desertification, land degradation and drought mitigation.

In particular, as specified in document ICCD/CRIC(8)/5/Add.5, paragraph 12, theme 1 'SLM technologies, including adaptation' refers to SLM technologies that directly contribute to the prevention, mitigation and rehabilitation of desertification and land degradation on cropland, grazing land and woodland, with the aim of improving the livelihoods of affected populations and conserving ecosystem services. Successful implementation of SLM technologies is the base for achieving strategic objectives 1, 2 and 3 of The Strategy. Theme 1 also integrates five of the strategic areas defined by decision 8/COP.4, namely: (a) sustainable land use management, including water, soil and vegetation in affected areas; (b) sustainable use and management of rangelands; (c) development of sustainable agricultural and ranching production systems; (d) development of new and renewable energy sources; and (e) launching of reforestation/afforestation programmes/ intensification of soil conservation programmes.

ICCD/CRIC(8)/5/Add.5 provides definitions for 'practice', 'good practice' and 'best practice'. These definitions are included in the common glossary that shall be referred to by Parties and other reporting entities while reporting to UNCCD, according to decision 13/COP.9, paragraph 8.

The template for reporting is based on the general structure for the documentation of best practices contained in ICCD/CRIC(8)/5/Add.5, paragraphs 40 to 43; it is tailored to the documentation of best practices related to theme 1 'SLM technologies, including adaptation'.

Best Practice #1 — Reboisement des berges du Niger et affluent sur les zones dénudées de la mare de Kondala à Faranah

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Reboisement des berges du Niger et affluent sur les zones dénudées de la mare de Kondala à Faranah

Location (if available, also include a map)

Commune urbaine de Faranah

Attachments:

- Rapport final mangrove ADAM.pdf

If the location has well defined boundaries, specify its extension in hectares

Hectares (ha)

Estimated population living in the location

Number of people

1833 habitants

Prevailing land use within the specified location

- Cropland
- Grazing land
- Woodland
- Unproductive land
- Human settlement

Other (specify) (max 30 words)

No answer provided

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Le climat est de type tropical, caractérisé par l'alternance de deux saisons : une saison sèche (octobre - avril) et une saison pluvieuse (mai - septembre)

Soil: (max 50 words)

on y rencontre des sols hydro morphes et faiblement ferrallitiques propices aux cultures vivrières, maraîchères et arboriculture.

Topography: (max 50 words)

le relief est peu accidenté et caractérisé par une savane arborée et herbacée

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

le revenu des populations est très faible

Main income sources: (max 50 words)

agriculture, élevage, arboriculture, pêche, chasse et petit commerce

Land tenure and land use rights: (max 50 words)

propriété coutumière, location de terre et troc

Short description of the best practice

max 250 words

Le projet contribue à la réduction et à la prévention de la dégradation des écosystèmes et de leurs ressources biologiques du bassin du haut Niger à travers une gestion participative et durable

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

Le fleuve Niger qui prend sa source à Faranah, un cours d'eau international dont le bassin hydrographique couvre 9 pays africains pour une population estimée à près de 300 millions d'habitants. Malheureusement, ce cours supérieur du Niger est aujourd'hui dans un état de dégradation près poussé, mettant ainsi en danger la vie de ces millions d'âme. D'où le projet sous régional « inversion des tendances à la dégradation des terres et des eaux dans le bassin du Niger (ITDTE).

With respect to DLDD, the best practice directly contributes to:

- **Prevention**
 - **Mitigation**
 - **Rehabilitation**
-

Main problems addressed by the best practice

(max 50 words)

- **-Environnemental;lutte contre l'exploitation anarchique des ressources ayant entraîné la perturbation des écosystèmes, favorisé la baisse du régime pluviométrique et une baisse considérable du débit des cours d'eaux ;**
 - **-Economique:amélioration du pouvoir d'achat des populations locales ;**
 - **-Social :contribution à la consolidation du tissu social fragilisé par la baisse du pouvoir d'achat, l'insécurité et la crise d'emplois ;**
-

Outline specific land degradation problems addressed by the best practice

max 100 words

l'agriculture itinérante, l'élevage extensif avec surpâturage, coupe abusive de bois.

Specify the objectives of the best practice

(max 50 words)

- **-contribuer à la réduction et la prévention de la dégradation**
 - **- protéger les ressources biologiques ;**
 - **-développer les capacités de prise de décision éclairées au niveau local, national et régional**
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- **-Sensibilisation, plaidoyer, éducation des populations concernées ;**
- **-Reboisement avec des essences à multiples usages (anacardiens, et autres) ;**
- **-Mise en défens des galeries forestières le long des cours d'eaux ;**
- **-Formation des acteurs et bénéficiaires sur la gestion durable des ressources.**

Objective 2

(max 50 words)

No answer provided

Objective 3

(max 50 words)

No answer provided

Objective 4

(max 50 words)

No answer provided

Short description of the technology

max 250 words

-Revue documentaire ;

- élaboration de module de sensibilisation et de formation ;
- sensibilisation, formation ;
- préparation du reboisement (choix participatif des espèces et sites à reboiser, pépinière) ;
- reboisement (nettoyage, piquetage, trouaison, plantation) ;
- entretien et suivi.

Technical specifications of the technology - if any

max 250 words

No answer provided

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

Autorité du Bassin Niger (ABN): Projet inversion des tendances à la dégradation des terres et des eaux dans le bassin du Niger (PITDTE-BN)

Address

Ministère de l'hydraulique et de l'énergie, Direction nationale de l'hydrologie, coordonnateur du projet ;
Tél: (00224) 67556427 ; Email : karamoko.kaba@yahoo.fr

Was the technology developed in partnership?

Yes

If yes, list the partners:

- -L'Association Guinéenne pour le Développement Rural (AGPDR)
 - -FEM ;
 - -Communauté locale de Kondala ;
 - -Direction préfectorale de l'agriculture ;
 - -Sections Préfectorales: génie rural,élevage,environnement eaux et forêts.
-

Specify the framework within which the technology was promoted

- Local initiative
- National initiative – government-led
- International initiative
- Programme/project-based initiative
- Other

Other (specify) (max 30 words)

L'initiative est sous régionale et rentre dans le cadre des eaux internationales . Elle concerne neuf pays africain.

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- -ONG nationale :AGPDR (Association Guinéenne pour le Développement Rural) ;
 - -Comité local de coordination et de suivi (CLCS);
-

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

-L'AGPDR est le porteur du projet (conception, introduction)

-Le CLCS jouit de l'utilisation et la maintenance de la technologie

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- Consultation
- Participatory approaches

Other (specify) (max 30 words)

No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
 - 2. To improve the conditions of affected ecosystems
 - 3. To generate global benefits through effective implementation of the UNCCD
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

-Régularisation du régime du fleuve Niger

2. (max 50 words)

-Amélioration des conditions de vie des populations.

Socio-economic level (including cultural level):

1. (max 50 words)

Acquisition de bonne aptitude de gestion intégrée des ressources naturelles

2. (max 50 words)

Diminution des conflits fonciers

Environmental level:

1. (max 50 words)

Gestion durable des écosystèmes du cours supérieur du Haut Niger

2. (max 50 words)

Réduction de la dégradation du sol

Other (specify)

1. (max 50 words)

Création d'une dynamique participative de gestion des sources

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

Effet d'entraînement des bonnes pratiques de gestion durable des ressources dans les zones environnantes.

2. (max 50 words)

Augmentation de la disponibilité en eau en aval de la zone du projet.

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

La reconstitution de la galerie le long du cours d'eau favorise le développement de la biodiversité et l'absorption du carbone.

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

Yes

Explain the reasons:

max 250 words

La présence du boisement le long du cours d'eau est un facteur qui modère le micro climat.

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

L'utilisation de variétés à cycle court dans les spéculations agricoles pour éviter leur inondation en temps de crue est une mesure d'adaptation au phénomène de changement climatique.

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising
 - Knowledge management and decision support
 - Policy; legislative; institutional framework
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Sabadou Bara Nama dans Kankan

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- **Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)**
 - **Fiscal incentives (for example, exemption from or reduction of taxes, duties, fees, etc)**
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

La prise de conscience de la population de l'état de dégradation du cours d'eau

2. (max 50 words)

La volonté politique de gestion commune de l'écosystème fluvial à l'échelle sous régionale.

3. (max 50 words)

La structuration du monde paysan en groupements et associations.

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- **Local**
 - **Sub-national**
 - **National**
 - **Subregional**
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- **La forte dégradation des ressources en eau a entraîné une conscientisation de la population dans la zone du bassin supérieur du haut Niger.**
-

Related to financial aspects

(max 50 words)

- **Les ruptures de financement n'ont pas permis de réaliser toutes les actions prescrites dans le Programme de Gestion durable des Terres.**
-

Related to technical aspects

(max 50 words)

- **La diffusion des bonnes pratiques a favorisé le transfert des technologies adaptées au niveau des zones rurales.**

Best Practice #2 — Gestion participative en zone de mangrove

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Gestion participative en zone de mangrove

Location (if available, also include a map)

Littoral guinéen

Attachments:

- Rapport final mangrove ADAM.pdf
-

If the location has well defined boundaries, specify its extension in hectares

Hectares (ha)

1 673 000 ha

Estimated population living in the location

Number of people

Nombre de personnes 107.989

Prevailing land use within the specified location

- Cropland
- Grazing land
- Woodland
- Unproductive land
- Human settlement
- Other

Other (specify) (max 30 words)

Les herbages et terres improductives sont constituées de tannes.

Les principales formations forestières sont les forêts de mangrove

Brief description of the natural environment within the specified location

Climate: (max 50 words)

le climat est du type tropical caractérisé par l'alternance de deux saisons : sèche (Décembre - Avril) et pluvieuse (Mai - Novembre), avec une pluviométrie moyenne de 3500 mm par an .

Soil: (max 50 words)

sol de mangrove

Topography: (max 50 words)

plaine côtière

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

le revenu des populations est très faible

Main income sources: (max 50 words)

agriculture, pêche, extraction de sel, coupe de bois de mangrove, élevage, arboriculture, et petit commerce.

Land tenure and land use rights: (max 50 words)

propriété coutumière, location de terre et troc

Short description of the best practice

max 250 words

Gérer durablement les ressources naturelles de la mangrove à travers une approche participative de protection, de restauration et création de sources alternative de revenus.

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

La pression progressive sur l'écosystème de mangrove et ses ressources biologiques due à la riziculture de mangrove itinérante, la coupe abusive du bois pour le fumage du poisson, l'extraction traditionnelle de sel, etc., conduit à une dégradation accélérée de ces ressources. D'où la nécessité d'entreprendre de bonnes pratiques de production, de protection et de restauration pour contrarier cette allure de la dégradation de la mangrove.

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- **Prevention**
 - **Mitigation**
 - **Adaptation**
 - **Rehabilitation**
-

Main problems addressed by the best practice

(max 50 words)

- **- élaboration des plans de gestion de quatre zones de mangrove dans la perspective d'une utilisation rationnelle et durable de la mangrove guinéenne ;**
 - **- réalisation d'actions pilotes de restauration/préservation de la mangrove ;**
 - **- organisation et structuration des filières de production ;**
 - **- Diffusion du code forestier**
-

Outline specific land degradation problems addressed by the best practice

max 100 words

La destruction de la flore et faune par :

- **- les mauvaises pratiques anthropiques (agriculture, extraction de sel, exploitation du bois etc.)**
 - **- les contraintes socio- économiques**
 - **- L'ignorance des codes juridiques et réglementaires**
 - **- L'extrême pauvreté**
-

Specify the objectives of the best practice

(max 50 words)

- **- identifier les causes profondes de la pression et des menaces qui pèsent sur la mangrove ;**

- Elaborer un plan de gestion participatif des ressources naturelles pour une exploitation durable de la mangrove;
 - Mener des actions pilotes (extraction du sel à l'aide l'énergie solaire, reboisement en mangrove ; réhabilitation des rizières, introduction et diffusion des fumoirs améliorés du type SCHORKOR ; introduction et diffusion des techniques améliorées de l'élevage d'huîtres):
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- -Sensibilisation ; diagnostic participatif ;

Objective 2

(max 50 words)

- -Priorisation des actions à mener ;

Objective 3

(max 50 words)

- -Formation sur actions prioritaires retenues

Objective 4

(max 50 words)

- -Mise en œuvre des actions prioritaires ;
 - -Transfert de technologie et suivi
-

Short description of the technology

max 250 words

- Revue documentaire ;
 - élaboration de module de sensibilisation et de formation ;
 - sensibilisation, formation sur les actions pilotes
 - réalisations participatives des activités
 - suivi de la mise en œuvre.
-

Question marked as 'No answer'.

Technical specifications of the technology - if any

max 250 words

No answer provided

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

Plan d'Actions Nationales de Lutte contre la Déforestation (PAN/LCD) Direction Nationale des Eaux et Forêts/Ministère de l'Environnement, des Eaux et Forêts et du Développement Durable/ Conakry

Address

DNEF, Jardin botanique de Camayenne; BP 624, Conakry

Was the technology developed in partnership?

Yes

If yes, list the partners:

- ONGs nationales ADAM, AGEMAF, AGRETAGE , ONRG
 - bureau d'étude BERCA Baara, Centre d'Etude et de Recherche en Environnement (CERE)
-

Specify the framework within which the technology was promoted

- Local initiative
- National initiative – government-led
- National initiative – non-government-led
- Programme/project-based initiative
- Other

Other (specify) (max 30 words)

O S C (organisation société civile)

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- -Projet « Plan d'Action National de Lutte Contre la Déforestation (PAN-LCD) » ;
 - Association pour le Développement Agricole de la -Mangrove(ADAM) ;
 - Association Guinéenne pour la Recherche et la promotion de Technologies de Gestion de l'Environnement (AGRETAGE) ;
 - BERCA Baara
 - CERE
-

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

- Plan d'Action National de Lutte Contre la Déforestation (PAN-LCD): Projet
 - ADAM maître d'œuvre
 - AGRETAGE opérateur chargé du transfert de technologie d'élevage d'huîtres ;
 - BERCA Baara opérateur chargé de la mise en œuvre des travaux d'aménagement ;
 - CERE opérateur chargé de l'analyse de qualité des produits
-

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- Consultation
- Participatory approaches
- Other

Other (specify) (max 30 words)

Sensibilisation

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
 - 2. To improve the conditions of affected ecosystems
 - 3. To generate global benefits through effective implementation of the UNCCD
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

Restauration de la mangrove

2. (max 50 words)

Création d'unités de gestion de la mangrove

Socio-economic level (including cultural level):

1. (max 50 words)

Augmentation du revenu des populations

2. (max 50 words)

Diminution des conflits fonciers

Environmental level:

1. (max 50 words)

Réduction de l'érosion côtière

2. (max 50 words)

Augmentation de la bioproduktivité de la zone côtière

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

Amélioration des pêcheries au niveau de plateau continental

2. (max 50 words)

Protection des plaines côtières contre la marée

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

- contribution à l'augmentation des ressources halieutiques en mangrove

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

Yes

Explain the reasons:

max 250 words

Absorption des gaz à effet de serre

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

Protection des zones côtières contre les inondations

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising
 - Knowledge management and decision support
 - Policy; legislative; institutional framework
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Koba, Dubréka, Wonkifong
-

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
 - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

Adhésion des populations aux objectifs fixés

2. (max 50 words)

La dégradation généralisée de l'écosystème de mangrove

3. (max 50 words)

Facilité de la reproductibilité des technologies proposées

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
 - Sub-national
 - National
 - Subregional
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- Renforcement de capacité des acteurs locaux dans la gestion durable des ressources de la mangrove
-

Related to financial aspects

(max 50 words)

- Création de sources de revenus pour les populations
-

Related to technical aspects

(max 50 words)

- Introduction et diffusion de technologies appropriées

Best Practice #3 — Amélioration des systèmes d'agriculture traditionnelle pour la conservation de la diversité biologique du fleuve DJON-Sabadou Baranama.»

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Amélioration des systèmes d'agriculture traditionnelle pour la conservation de la diversité biologique du fleuve DJON-Sabadou Baranama.»

Location (if available, also include a map)

Sous préfecture de Saba Dou Baranama prefecture de kankan

Attachments:

- Rapport final mangrove ADAM.pdf
-

If the location has well defined boundaries, specify its extension in hectares

Hectares (ha)

10 ha agroforesterie

Estimated population living in the location

Number of people

Nombre de personnes 11666 habitants

Prevailing land use within the specified location

- Cropland
- Grazing land
- Unproductive land
- Human settlement

Other (specify) (max 30 words)

No answer provided

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Le climat est de type tropical, caractérisé par l'alternance de deux saisons : une saison sèche (octobre - avril) et une saison pluvieuse (mai - septembre)

Soil: (max 50 words)

on y rencontre des sols de plaine inondable constitués de limons argileux et de sols sablo argileux fortement lessivés.

Topography: (max 50 words)

le relief est peu accidenté et caractérisé par une savane arborée et herbacée

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

le revenu des populations est très faible

Main income sources: (max 50 words)

agriculture, élevage, arboriculture, pêche, chasse et petit commerce

Land tenure and land use rights: (max 50 words)

propriété coutumière, location de terre et troc

Short description of the best practice

max 250 words

Le projet contribue à la réduction et à la prévention de la dégradation des écosystèmes et de leurs ressources biologiques du bassin du haut Niger à travers une gestion participative et durable le long du fleuve DJON, affluent droit du Niger.

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

Le fleuve Djon est un affluent droit du Niger qui prend sa source à Moussadou dans la prefecture de Beyla. Il est plus large à Sabadou Baranama, dans la prefecture de Kankan. Ses affluents sont les rivières Loumou, Tèmè, Modè, Sibirini. Comme ce cours d'eau alimente un fleuve international dont le bassin hydrographique couvre 9 pays africains pour une population estimée à près de 300 millions d'habitants. Malheureusement, ce cours supérieur du Niger est aujourd'hui dans un état de dégradation près poussé, mettant ainsi en danger la vie de ces millions d'âme. D'où le projet sous régional « inversion des tendances à la dégradation des terres et des eaux dans le bassin du Niger (ITDTE).

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- **Prevention**
 - **Mitigation**
 - **Rehabilitation**
-

Main problems addressed by the best practice

(max 50 words)

- **-Environnemental: lutte contre l'exploitation anarchique des ressources biologiques;**
 - **-Economique: amélioration du pouvoir d'achat des populations locales;**
 - **-Social: contribution à la consolidation du tissu social fragilisé par la pauvreté**
-

Outline specific land degradation problems addressed by the best practice

max 100 words

L'agriculture itinérante, l'élevage extensif avec surpâturage, coupe abusive de bois, fabrication de brique cuite.

Specify the objectives of the best practice

(max 50 words)

- **-contribuer à la réduction et la prévention de la dégradation**
 - **-protéger les ressources biologiques ;**
 - **-développer les capacités de prise de décision aux niveaux local, national et régional.**
-

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- -Sensibilisation, plaidoyer, éducation des populations concernées;
- Incitation à la prise de décision.

Objective 2

(max 50 words)

- Reboisement avec des essences à usages multiples

Objective 3

(max 50 words)

- Mise en défens des galeries forestières

Objective 4

(max 50 words)

- Formation des acteurs et bénéficiaires sur la gestion durable des ressources naturelles
-

Short description of the technology

max 250 words

- Revue documentaire ;
 - élaboration de module de sensibilisation et de formation ;
 - sensibilisation, formation ;
 - préparation du reboisement (choix participatif des espèces et périmètres de reboisement, création de pépinière);
 - reboisement (nettoyage, piquetage, trouaison, planting) ;
 - entretien et suivi.
-

Technical specifications of the technology - if any

max 250 words

No answer provided

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

Autorité du Bassin Niger: Projet inversion des tendances à la dégradation des terres et des eaux dans le bassin du Niger

Address

Ministère de l'hydraulique et de l'énergie, Direction nationale de l'hydrologie, coordonnateur du projet ;
Tél: (00224) 67556427 ; Email : karamoko.kaba@yahoo.fr

Was the technology developed in partnership?

Yes

If yes, list the partners:

- -FEM ;
- Communauté locale de OCB DÖKELE ;
- DHD :développement humain durable
- CLE :comité local de l'eau

-PARC DIWASI :Zone animale

- Services préfectoraux de l'agriculture ; génie rural ; élevage ; promotion rurale et vulgarisation ; environnement ; eaux et forêts.

Specify the framework within which the technology was promoted

- Local initiative
- National initiative – government-led
- National initiative – non-government-led
- International initiative
- Programme/project-based initiative
- Other

Other (specify) (max 30 words)

L'initiative est sous régionale et rentre dans le cadre des eaux internationales

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology?
Yes

If yes, list local stakeholders involved:

- - ONG nationale : OCB DÖKELE
 - Comité local de coordination et de suivi (CLCS);
-

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

- ONG nationale : OCB DÖKELE est le porteur du projet (conception, introduction). - Le CLCS jouit de l'utilisation et la maintenance de l

Was the population living in the location and/or nearby involved in the development of the technology?
Yes

If yes, by means of what?

- Participatory approaches

Other (specify) (max 30 words)

No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
 - 2. To improve the conditions of affected ecosystems
 - 3. To generate global benefits through effective implementation of the UNCCD
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

Amélioration des conditions de vie des populations

2. (max 50 words)

Protection des écosystèmes

Socio-economic level (including cultural level):

1. (max 50 words)

Amélioration du niveau de vie de la population

2. (max 50 words)

Réduction des conflits sociaux

Environmental level:

1. (max 50 words)

Contribution à la régulation du régime du fleuve dion

2. (max 50 words)

Contribution à l'augmentation de la pluviométrie

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

Diffusion des bonnes pratiques agricoles

2. (max 50 words)

Conservation de la biodiversité

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

- Contribution à la gestion durable de la diversité biologique

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

Yes

Explain the reasons:

max 250 words

Séquestration du gaz à effet de serre

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

Agriculture adaptée aux conditions climatiques

Has a cost-benefit analysis been carried out?

No

If yes, summarize its main conclusions:

max 250 words

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes

- Capacity-building and awareness-raising
 - DLDD and SLM monitoring and assessment/research
 - Knowledge management and decision support
 - Policy; legislative; institutional framework
 - Funding/resource mobilization
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

No

If yes, where? (add as many rows as necessary)

Location:

No answer provided

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
 - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

Approche participative

2. (max 50 words)

Simplicité de la technologie

3. (max 50 words)

Prise de conscience de l'état de dégradation des ressources naturelles

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
- Sub-national

- **National**
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- **Renforcement de capacités des acteurs locaux**
-

Related to financial aspects

(max 50 words)

- **Amélioration du revenu des populations concernées**
-

Related to technical aspects

(max 50 words)

- **Facile maîtrise de la technologie par des populations à majorité analphabètes**
