Qualitative assessment

Does your country have a national communication strategy addressing DLDD and/or DLDD synergies with climate change and biodiversity in place?

Yes

No

Provide any complementary information as needed (e.g., regarding the implementation of the Comprehensive Communication Strategy, activities relating to the United Nations Decade for Deserts and the Fight Against Desertification, etc.):

Operational objective 1: Advocacy, awareness raising and education

In Hungary a scientific meeting is convened on the occasion of the World Day to Combat Desertification in every year. Stakeholders, scientists and decision makers are gathering to go through drought related issues in the form of presentations and discussions.

In 2012 as part of the consultation process of the National Water Strategy a series of information events were organized. During this roadshow wide range of stakeholders have been reached also in the theme of DLDD.

Information events concerning the River Basin Management Planning and the consultation of the National Climate Change Strategy were also considered here.

We also counted here the annual meeting of the Hungarian Hydrological Society and joint workshop of the Hungarian Meteorological Society and the Hungarian Hydrological Society on meteorology and hydrology of the previous year.

In addition the Budapest Water Summit has been taken place in 2013.

Estimation of the number of mass media articles, TV/radio programmes about DLDD is difficult. The five most important TV and a radio station is usually informing the public on these issues in connection with serious droughts and floods. It is worth to mention that the latter gets more publicity.

Programmes focusing on agriculture also touch the topic of DLDD. To estimate the number of newspaper articles is more challenging because the newspapers with the highest number of copies sold are not necessarily those which dealing with these issues. Furthermore, newspapers contain information on DLDD related topics during natural disasters which makes it more difficult to measure.

Operational objective 1: Advocacy, awareness raising and education
