# Performance Indicators

## C. Performance indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Affected country Parties are requested to report on the following fourteen performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by affected country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

## Operational Objective 1: Advocacy, awareness raising and education

---

### Performance indicator CONS-O-1 for Outcome 1.1

*Operational Objective 1: Advocacy, awareness raising and education*

*Performance indicator CONS-O-1 for Outcome 1.1*

*Number and size of information events organized on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.*

*Understanding of the indicator*

*At the national and local level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by affected country Parties by reporting on Convention-related communication strategies at subregional, regional and global level.*

*Data needed*

*Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity.*

*Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.).*

*Events organized and media produced by the UNCCD NFP or organized/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.*

*Data sources (indicative only)*

*International and national media (newspapers) advertising the events at national and local level, the Internet, the organizers of the events, programmes/projects' final reports.*

*Check the glossary for*

*'NFP', 'ICT', 'Information events', 'Media products', 'STIs', 'CSOs'*

*Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).*

*Overall target*

*By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity*

### **Performance indicator CONS-O-3 for Outcome 1.3**

*Operational Objective 1: Advocacy, awareness raising and education*

*Performance indicator CONS-O-3 for Outcome 1.3*

Number of CSOs and science and technology institutions participating in the Convention processes.

*Understanding of the indicator*

At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

*Data needed*

The specification of the organizations involved in the programmes/projects as reported in the PPSs.

*Data sources (indicative only)*

PPSs submitted to the UNCCD as part of the reporting exercise.

*Check the glossary for*

'STIs', 'CSOs', 'PPS', 'Convention processes'

*Overall target*

A steady growth in the participation of CSOs and science and technology institutions in the Convention processes is recorded along the implementation period of The Strategy.

*The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on "education" because "awareness" and "advocacy" are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level.*

*Data needed*

*Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula.*

*Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.*

## Operational Objective 2: Policy framework

---

### Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

*Operational Objective 2: Policy framework*

*Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3*

*Number of affected country Parties, subregional and regional entities to have finalized the formulation/revision of NAPs/SRAPs/RAPs aligned to The Strategy, taking into account biophysical and socio-economic information, national planning and policies, and integration into investment frameworks.*

*Understanding of the indicator*

*At the national level, the indicator measures the performance of affected country Parties in formulating or revising their NAPs in alignment with The Strategy. While providing information on this process, the indicator also outlines whether: (a) the analysis of DLDD drivers, barriers to possible solutions, and measures that may eventually overcome these barriers, has been carried out; (b) the alignment process has been supported by biophysical and socio-economic baseline information; (c) the action programmes have been included in integrated investment frameworks; and (d) the action programmes have been integrated with other existing national plans and policies. The indicator will inform on the extent to which Parties have responded to decision 3/COP.8, paragraph 45, and on the feasibility of assessing the progress of The Strategy over its implementation period (2008–2018). Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on formulation or revision of SRAPs and RAPs in alignment with The Strategy.*

*Data needed*

*UNCCD NAP. Only a NAP formally approved by the relevant governmental authorities is to be considered as 'finalized'. Other relevant planning documents.*

*Data sources (indicative only)*

*UNCCD NFP.*

*Check the glossary for*

*'Finalized', 'NAP', 'NFP', 'driver', 'barrier', 'integrated investment framework', 'baseline'*

*Overall target*

*By 2014, at least 80 per cent of affected country Parties, subregional and regional entities have formulated/revise a NAP/SRAP/RAP aligned to The Strategy.*

**Performance indicator CONS-O-7 for Outcome 2.5**

*Operational Objective 2: Policy framework*

*Performance indicator CONS-O-7 for Outcome 2.5*

*Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.*

#### *Understanding of the indicator*

The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place at the national level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. This information will be complemented by the reporting of other reporting entities on synergistic processes at the subregional, regional and global level.

#### *Data needed*

Planning/programming documents and legislative/regulatory documents.

Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

#### *Data sources (indicative only)*

Relevant national ministries.

#### *Check the glossary for*

For an indicative list of activities by Parties to promote synergies among the Rio Conventions, refer to [target=' \\_blank>UNEP/CBD /COP/DC/IX/16, Annex II](#)

#### *Overall target*

By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions

---

### **Are you implementing joint planning/programming initiatives for the three Rio Conventions?**

**Yes**

**If yes, specify the type of joint initiative(s) (tick as many boxes as necessary)**

- Review of national plans and identification of gaps in synergies
- Identification of sectors and policies that could benefit from synergies and cooperation
- Review of plans and policies to enhance cooperation

## Operational Objective 3: Science, technology and knowledge

---

### Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

*Operational Objective 3: Science, technology and knowledge*

*Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2*

*Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional /regional monitoring system for DLDD.*

*Understanding of the indicator*

*At the national level, the indicator measures the monitoring potential of the country by quantifying the number of monitoring systems established and supported. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties during the implementation of The Strategy and beyond. This information will be complemented by the reporting of other reporting entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.*

*Data needed*

*Information on monitoring systems established within the national Ministries or other bodies/institutions.*

*Programmes/projects' documents, fiches and summary sheets, programmes/projects' interim or final reports.*

Number of affected country Parties, subregional and regional entities reporting to the Convention along revised reporting guidelines on the basis of agreed indicators

#### Understanding of the indicator

The indicator measures the use of biophysical and socio-economic information at the national level in defining a commonly agreed core set of impact indicators for the UNCCD and in monitoring progress against these indicators using harmonized methodologies.

The indicator will inform to what extent it is possible to compile a comparable and global assessment of UNCCD impact.

Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the use of impact indicators at the subregional and regional levels, if and when impact indicators for these levels will be commonly agreed upon by the Conference of the Parties.

#### Data needed

Reports to the UNCCD by affected country Parties in 2012 and 2016.

The information to report on this indicator will be compiled by affected country Parties every four years when reporting on the strategic objectives that require biophysical and socio-economic information (i.e. SO1, SO2 and SO3). Reporting on this indicator is due in 2012 and in 2016 only.

#### Overall target

By 2018, at least 90 per cent of affected country Parties, subregional and regional reporting entities report to the Convention in compliance with the new reporting guidelines.

## **Performance indicator CONS-O-10 for Outcome 3.3 and 3.4**

*Operational Objective 3: Science, technology and knowledge*

*Performance indicator CONS-O-10 for Outcome 3.3 and 3.4*

*Number of revised NAPs/SRAPs/RAPs reflecting knowledge of DLDD drivers and their interactions, and of the interaction of DLDD with climate change and biodiversity.*

*Understanding of the indicator*

*The indicator measures knowledge-transfer processes from the theoretical to the operational level. This is done through an assessment carried out by affected country Parties (self-assessment) of the levels of traditional and scientific knowledge reflected in their NAPs. The assumption is that NAPs based on sound scientific and traditional knowledge will propose more significant and effective strategies and activities for implementation at the national level, and will, ultimately, perform better than those NAPs that do not take into account available knowledge on DLDD and DLDD synergies. The indicator will inform to what extent UNCCD implementation is likely to achieve meaningful results. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the assessment of their SRAPs and RAPs.*

Performance indicator CONS-O-11 for Outcome 3.5

Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator

The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Data needed

#### *Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2*

*Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments*

#### *Understanding of the indicator*

*At the national level the indicator measures the presence of capacity-building processes through the quantification of existing major capacity-building initiatives. The indicator will inform to what extent affected country Parties may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). This information will be complemented by the reporting of other reporting entities on existing UNCCD-related capacity-building initiatives at the subregional, regional and global level.*

# Standard Financial Annex

## D. Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilized by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimize double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organization, and the funding period, if applicable;

(c) Classification, i.e. categorization of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.

# Programme and Project Sheets

## *E. Programme and Project Sheet*

*Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.*

*The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.*

*A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorized using the Rio Markers for desertification and Relevant Activity Codes (RACs).*

*Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the UN Convention on Biological Diversity, CBD – and the UN Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.*

*The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.*

*Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.*

*To minimize the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.*

*In the PPS template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by country Parties and other reporting entities with relevant data or narrative information.*

### **Expected or achieved results**

Provide information on the results achieved or expected from the implementation of the Programme/Project (max 100 words).

- i. Environment was recognised as a complementary sector in the five year NDP and mainstreamed into the NDP. PEI supported the drafting of sector and sub-sector papers (Forestry, Wetlands, Environment, Weather, Climate and Climate Change) that were written to inform the NDP process.
- ii. PEI organized a retreat of the Members of the Parliamentary committee on Natural Resources who

- committed themselves to advocate for increased budget allocation to the environment.
  - iii. NEMA with support from PEI lobbied for the Ministry of Finance (MFPED) to include a requirement in the budget call circular for all sectors and local governments to mainstream environmental issues into their Budget framework papers and attached mainstreaming guidelines to the circular.
  - iv. PEI supported participation of the ENR sector in the budget process at both national and local government levels at which an issues paper was developed and forwarded to the Director Budget for review and consideration of the issues raised.
  - v. The reviews done under the PEI helped to highlight the gap between mainstreaming of environment in policies and the lack of implementation, especially at the sub-national levels.
  - vi Increased level of awareness on poverty and environment linkages at both local and national levels.
  - vii. Nakasongola, Butaleja and Masindi districts were supported to develop District Environmental Policies. PEI is currently supporting these districts to implement the Environmental policies through the implementation of micro land use plans at a village level.
  - viii. Carried out an Integrated Ecosystem Assessment (IEA) of the Lake Kyoga catchment and findings disseminated at local and national levels to support policy and decision making. A new course on IEA was developed and is offered at Masters level at Makerere University.
  - ix. PEI supported Butaleja, Nakasongola, Bududa, Mukono, Masaka and Kayunga districts to implement micro projects demonstrating poverty-environment linkages. Best practices and lessons learnt were compiled and disseminated with the main objective of informing future policy on micro projects.
  - x. PEI supported the participation of the National Focal Point (Ronald Kaggwa) to participate in a capacity building training course in the use of Economic tools for environmental conservation that was organized by the Conservation Strategy Fund (CSF) at Stanford University in USA.

# Additional Information

## F. Additional information

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by affected country Parties and consequently to make more targeted and specific recommendations to the COP. It allows affected country Parties to comment or report upon issues that are not covered elsewhere but that are nevertheless of importance at the national level or within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process and on the implementation of NAPs as well as lessons learnt, problems, constraints and bottlenecks faced in terms of human and financial resources. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of affected country Parties within the framework of the Convention, as requested by decision 13/COP.9, paragraph 17.

## Reporting process-related issues

---

### **Financial resources**

Could your country count on sufficient financial resources to meet UNCCD reporting obligations?

**Yes**

**Provide an estimate of the amount invested from your country's national budget into the UNCCD reporting process.**

**10,000,000 Uganda Shilling**

---

### **Human resources**

How many people were involved in your country in the UNCCD reporting process?

Number of people

**100**

**Estimate the total number of person/day dedicated by these persons to the UNCCD reporting process:**

Number of person/day

**2 for 80, 10 for 15, 10 for 15, 30 for 5**

---

### **Knowledge**

Could your country count on sufficient technical and scientific knowledge to meet UNCCD reporting obligations?

**No**

---

### **Coordination**

Was coordination with the relevant implementing agencies satisfactory in order to apply for necessary funds?

**No**

**Was coordination at the national level with the relevant line ministries satisfactory in order to comprehensively and coherently report?**

**Yes**

---

### **Participation and consultation**

Was a participatory or consultative approach applied to involve all relevant stakeholders in the reporting process?

**Yes**

---

***Validation meeting***

Was a validation meeting held as a tool to integrate stakeholders in the reporting process?

**Yes**

---

***Subregional and regional processes***

Did your country actively contribute to the subregional and regional reporting processes?

**No**

---

***PRAIS portal***

If you are reporting online, did you receive sufficient training on access and utilization of the PRAIS portal?

**Yes**

## Accommodation of specific requests within COP decisions

---

### **Report on specific COP requests – iterative process on indicators**

Decision 13/COP.9, paragraphs 2, 3 and 24, envisages an iterative process to refine the set of performance indicators provisionally adopted by the same decision. As a tool to implement this iterative process, affected country Parties can provide here their suggestions and recommendations for improvement.

Tick the cells only when you have experienced difficulties in reporting on one, or more, indicator(s). Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.

## Reporting on the implementation of NAP

---

*Which is the percentage of activities included in the NAP that are currently implemented?*

31-60%

---

### Human resources

---

*Lessons learnt (report on the 2 most important only)*

- 1  
Low access to internet and electronic communication reduced participation of stakeholders.
  - 2  
Hiring a team of consultants is more effective in data collection and consultative process than hiring a single consultant which made it difficult for him to reach all stakeholders within the time framework.
- 

*Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)*

- 1  
Different organizations have different data formats: as such, some of the detailed information could not be gathered for some projects.
  - 2  
Some institutions were hesitant to provide the required information concerning their activities
- 

### Financial resources

---

*Lessons learnt (report on the 2 most important only)*

- 1  
Adequate financial resources should be provided if all stakeholders including local governments are to be consulted.
  - 2  
In some cases the most affected communities are in far remote and inaccessible areas requiring enough financial resources to consult and collect information from them.
- 

*Problems, constraints and bottlenecks currently faced by your country (report on the 2 most important only)*

- 1  
The limited financial resources could not allow for adequate data collection and consultation with all stakeholders.
- 2  
In where data had to be brought the available financial resources could not pay for all the data.

## Any other country-specific issues

---

*Has your country any specific issue to bring to the attention of the Conference of the Parties?*

Yes

*If yes, please specify under which of the following broad categories it can be classified.*

**Category**

Participation; collaboration; networking

**Other (specify) (max 30 words)**

**No answer provided**

**Narrative description**

# Best Practices

## G. Best practices

According to decision 13/COP.9, Annex V, UNCCD best practices shall be collected according to seven themes: 1. SLM technologies, including adaptation; 2. Capacity building and awareness raising; 3. DLDD and SLM monitoring and assessment/research; 4. Knowledge management and decision support; 5. Policy, legislative, institutional framework; 6. Funding/resource mobilization; 7. Participation, collaboration and networking.

While themes 2 to 7 represent different elements of the enabling environment needed for the implementation and dissemination/up-scaling of sustainable land management (SLM) technologies (indirect impact), theme 1 comprises all actions on the ground that have a direct impact on desertification, land degradation and drought mitigation.

In particular, as specified in document ICCD/CRIC(8)/5/Add.5, paragraph 12, theme 1 'SLM technologies, including adaptation' refers to SLM technologies that directly contribute to the prevention, mitigation and rehabilitation of desertification and land degradation on cropland, grazing land and woodland, with the aim of improving the livelihoods of affected populations and conserving ecosystem services. Successful implementation of SLM technologies is the base for achieving strategic objectives 1, 2 and 3 of The Strategy. Theme 1 also integrates five of the strategic areas defined by decision 8/COP.4, namely: (a) sustainable land use management, including water, soil and vegetation in affected areas; (b) sustainable use and management of rangelands; (c) development of sustainable agricultural and ranching production systems; (d) development of new and renewable energy sources; and (e) launching of reforestation/afforestation programmes/ intensification of soil conservation programmes.

ICCD/CRIC(8)/5/Add.5 provides definitions for 'practice', 'good practice' and 'best practice'. These definitions are included in the common glossary that shall be referred to by Parties and other reporting entities while reporting to UNCCD, according to decision 13/COP.9, paragraph 8.

The template for reporting is based on the general structure for the documentation of best practices contained in ICCD/CRIC(8)/5/Add.5, paragraphs 40 to 43; it is tailored to the documentation of best practices related to theme 1 'SLM technologies, including adaptation'.

## Best Practice #1

---

### Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

**No**

**If yes, please provide relevant information on the holder of the rights.**

**(max 100 words)**

**No answer provided**

---

### Section 1. Context of the best practice: frame conditions (natural and human environment)

---

#### Title of the best practice

**No answer provided**

---

#### Location (if available, also include a map)

**Mubende, Kyenjojo districts in the Albertine rift**

#### Attachments:

none

---

**If the location has well defined boundaries, specify its extension in hectares**

Hectares (ha)

**Hectares (ha) .....Over 1000 ha .....**

---

***Estimated population living in the location***

Number of people  
over 500

---

***Prevailing land use within the specified location***

**No answer provided**

***Other (specify) (max 30 words)***

Mainly forest land use with small sections for crop land, grazing and settlement

---

***Brief description of the natural environment within the specified location***

Climate: (max 50 words)

**No answer provided**

***Soil: (max 50 words)***

**No answer provided**

***Topography: (max 50 words)***

**No answer provided**

---

***Prevailing socio-economic conditions of those living in the location and/or nearby***

Income level: (max 50 words)

**No answer provided**

***Main income sources: (max 50 words)***

Agriculture and trade in forest products such as timber

***Land tenure and land use rights: (max 50 words)***

Land tenure and land use rights: Mailo land tenure with underlying challenges of absentee land lords and sitting tenants i.e. bibanja holders

---

***Short description of the best practice***

max 250 words

Forest based enterprises are based in the forest. They accrue economic benefits without compromising the integrity of the environment and natural resources. Hence, they environmentally friendly, economically viable, socially acceptable.

---

***On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?***

max 100 words

Source of income thus contributing to poverty reduction  
Sustains the ecosystem thus has environment attributes  
Contributes to food security and nutrition at household level  
Provides community with alternative livelihood options than entirely depending on the forest.

---

**Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice**

---

***With respect to DLDD, the best practice directly contributes to:***

- Mitigation
  - Adaptation
- 

***Main problems addressed by the best practice***

(max 50 words)

- 1. deforestation
- 2. poverty

---

***Outline specific land degradation problems addressed by the best practice***

max 100 words

**Soil erosion and run off**

---

***Specify the objectives of the best practice***

(max 50 words)

- 1. To contribute to household income
- 2. Provides alternative livelihood opportunity

---

**Section 3. Activities**

---

***Brief description of main activities, by objective***

Objective 1

(max 50 words)

- 1. Awareness about forest degradation and possible interventions to avert it.
- 2. Training on management establishment and management

***Objective 2***

(max 50 words)

- Enhancing Institutional Development for producer organization.

***Objective 3***

(max 50 words)

- 1. Agri-business and Enterprise development.

***Objective 4***

(max 50 words)

- 2. Trainings in sustainable forest management.

---

***Short description of the technology***

max 250 words

**Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)**

---

***Name and address of the institution developing the technology***

**Name**

Environmental Alert, Ggaba road, sonko lane behind payless supermarket

**Address**

P.O.Box 11259 Kampala, Uganda

Fax: +256-41-510 547; P.O. Box 11259 Kampala; Tel: 0414510215; Fax: +256-41-510 547; Email:

envalert@envalert.org; Website: www.envalert.org

---

**Was the technology developed in partnership?**

Yes

**If yes, list the partners:**

- 1. Environmental Alert
- 2. Local government
- 3. Forest dependent communities
- 4. FORD Foundation

---

**Specify the framework within which the technology was promoted**

- National initiative – non-government-led

**Other (specify) (max 30 words)**

**No answer provided**

---

**Was the participation of local stakeholders, including CSOs, fostered in the development of the technology**

Yes

**If yes, list local stakeholders involved:**

- 1. Local government
- 2. Forest dependent communities

---

**For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.**

max 250 words

**No answer provided**

---

**Was the population living in the location and/or nearby involved in the development of the technology?**

Yes

**If yes, by means of what?**

- Consultation
- Participatory approaches

**Other (specify) (max 30 words)**

**No answer provided**

---

## **Section 5. Contribution to impact**

---

**Specify to which strategic objectives of The Strategy the technology contributes**

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
- 2. To improve the conditions of affected ecosystems

---

**Describe on-site impacts (the major two impacts by category)**

Production or productivity:

1. (max 50 words)

1. Honey production increased by over 60%. There exists a variety of improved grafted fast growing fruits in the area ranging from mangoes, oranges and avocados

2. (max 50 words)

2. Through training in nursery management, fruit tree growing, and beekeeping PFOs and farmers are able

to raise their own grafted seedlings, manage own tree nurseries, and make modern bee hives locally. The cost of a seedling has consequently reduced to UGX 1500 (US\$0.8) from UGX 3,000(\$1).

***Socio-economic level (including cultural level):***

1. (max 50 words)

1. Enterprise groups have been linked to marketing outlets for sale of their produce at competitive prices. They are now selling honey to Kabalore Beekeepers Association, Joint Effort to Save the Environment a local Community Based Organization, Supermarkets, NAADS and the private sector.

2. (max 50 words)

2. Realised establishment of 15 Private Forest Owners producer associations managing fruit trees and apiary enterprises for household income. These are recognized as key players in advancing sustainable forest management at community level.

***Environmental level:***

1. (max 50 words)

1. Over 900 acres of forests on private land in Mubende and Kyenjojo districts are sustainably managed, while approximately 1200 acres of private land is under conservation due to better understanding and application of sustainable land use practices.

2. (max 50 words)

**No answer provided**

***Other (specify)***

1. (max 50 words)

**No answer provided**

2. (max 50 words)

**No answer provided**

---

***Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts***

1. (max 50 words)

**No answer provided**

2. (max 50 words)

**No answer provided**

---

***Impact on biodiversity and climate change***

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

**Yes**

***Explain the reasons:***

max 250 words

**Promotes conservation of forests given that they can co-exist and adds to forest vegetation in the case of fruit trees growing in degraded forest patches**

***In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?***

**Yes**

***Explain the reasons:***

max 250 words

**Promotes conservation of forests given that they can co-exist and adds to forest vegetation in the case of fruit trees growing in degraded forest patches**

***In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?***

Yes

**Explain the reasons:**

max 250 words

**No answer provided**

---

**Has a cost-benefit analysis been carried out?**

No

**If yes, summarize its main conclusions:**

max 250 words

**No answer provided**

---

## Section 6. Connection to other UNCCD themes

---

**Specify if the technology relates to one or more of the other UNCCD themes**

- Capacity-building and awareness-raising
  - Knowledge management and decision support
  - Policy; legislative; institutional framework
  - Funding/resource mobilization
  - Participation, collaboration and networking
- 

## Section 7. Adoption and replicability

---

**Was the technology disseminated/introduced to other locations?**

Yes

**If yes, where? (add as many rows as necessary)**

Location:

- In neighboring sub counties within the districts of Mubende and Kyenjojo
  - West Nile region in the districts of Moyo, Yumbe and Adjumani and in Eastern Uganda in Tororo district
- 

**Were incentives to facilitate the take up of the technology provided?**

Yes

**If yes, specify which type of incentives**

- Policy or regulatory incentives (for example, related to market requirements and regulations, import/export, foreign investment, research & development support, etc)
  - Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
- 

**Can you identify the three main conditions that led to the success of the presented best practice/technology?**

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

**1. Involvement of all stakeholders including the immediate natural resources dependent communities in the planning, implementation and monitoring activities**

2. (max 50 words)

2. Undertaking baseline research to understand critical issues write from the beginning

3. (max 50 words)

**No answer provided**

---

*In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?*

Yes

*If yes, at which level?*

- Local
  - Sub-national
  - National
- 

## Section 8. Lessons learned

---

*Related to human resources*

(max 50 words)

- 1. Productive and gainful participation is very important for any initiative to succeed
- 

*Related to financial aspects*

(max 50 words)

- 1. Transparency and accountability.
- 

*Related to technical aspects*

(max 50 words)
