Committee for the Review of the Implementation of the Convention
Sixteenth session
Ordos, China, 7–13 September 2017
Item 3 of the provisional agenda
The UNCCD reporting and review process in view of the integration of the Sustainable Development Goals and targets into the implementation of the UNCCD
Improving the procedures for communication of information as well as the quality and formats of reports to be submitted to the Conference of the Parties

Reporting template for the 2017–2018 reporting process

Note by the secretariat

Summary

This document contains background information related to the draft reporting template developed by United Nations Convention to Combat Desertification institutions in the light of the future strategic framework of the Convention. In addition, the draft template has been annexed to this document to enable Parties to view the different sections related to qualitative and quantitative reporting.

Introduction

1. In line with document ICCD/CRIC(16)/5, the secretariat has prepared a draft template for the forthcoming reporting period starting immediately after the thirteenth session of the Conference of the Parties (COP 13). At the beginning of July 2017, the secretariat circulated the draft template for consideration and comments by Parties, together with the proposed future strategic framework as included in document ICCD/COP(13)/3. Furthermore, the secretariat incorporated into the draft template comments received by Parties, which are contained in this document.

2. Members of Intergovernmental Working Group on the future strategic framework of the Convention unanimously requested that future reporting should, apart from the reporting on progress indicators, focus on voluntary narrative reporting along with some predefined topics which are included in the draft reporting template in the annex. Following the proposed future strategic framework, the forthcoming reporting period will focus on (a) progress indicators, mainly using statistical data; and (b) the implementation framework, which will involve collecting experiences in implementing the future strategic framework through narrative sections.

3. Considering that the land-based progress indicators (Trends in land cover, trends in land productivity and trends in carbon stocks above and below the ground) for the Convention are being proposed to compute Sustainable Development Goal (SDG) indicator 15.3.1 (Proportion of land that is degraded over total land area), it is desirable that all Parties fill in the information. Developed country Parties may report on these indicators on a voluntary basis (as indicated in the table below) with the understanding that information received can be used for reporting on SDG indicator 15.3.1 by the secretariat, as the custodian agency for this indicator.

4. Moreover, Parties participating in the Land Degradation Neutrality Target Setting Programme (LDN-TSP) implemented by the Global Mechanism also have the opportunity to use the data submitted through the LDN-TSP interim report for the United Nations Convention to Combat Desertification (UNCCD) reporting process, thereby easing the reporting burden considerably.

5. The table below presents the reporting attribution for future reporting once Parties agree on the future strategic framework at COP 13. The reporting template is contained in the annex of this document.

Notes: Reporting on the implementation framework of the proposed future strategic framework will be voluntary.
Parties will be provided with the opportunity to share experiences on how particular initiatives and processes have been managed at national level (affected country Parties) and/or supported (developed country Parties).

* Developed country Parties can submit information for these indicators on a voluntary basis for the purpose of reporting under the Sustainable Development Goal process (particularly encouraged for indicator 15.3.1).
Annex

**Reporting template for the 2017–2018 reporting process**

The following is reproduced as extracted from the performance review and assessment of implementation system (PRAIS) to provide Parties with an accurate presentation of the reporting templates.
United Nations Convention to Combat Desertification

Contents

I. Strategic objectives

A. Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality
   - Indicator SO1-1: Trends in land cover
   - Indicator SO1-2: Trends in land productivity or functioning of the land
   - Indicator SO1-3: Trends in carbon stocks above and below ground
   - Sustainable Development Goal indicator 15.3.1: Proportion of land that is degraded over total land area
   - Voluntary targets

B. Strategic objective 2: To improve the living conditions of affected populations
   - Indicator SO2-1: Trends in population living below the relative poverty line and/or income inequality in affected areas
   - Indicator SO2-2: Trends in access to safe drinking water in affected areas
   - Voluntary targets

C. Strategic objective 3: To generate global benefits through effective implementation of the United Nations Convention to Combat Desertification
   - Indicator SO3-1: Trends in carbon stocks above and below ground
   - Indicator SO3-2: Trends in abundance and distribution of selected species
   - Voluntary targets

D. Additional indicators for strategic objectives 1, 2 and 3

E. Strategic objective (...): To mitigate and manage the effects of drought and enhance the resilience of ecosystems and the preparedness of affected populations, and improve response and recovery capabilities.

F. Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level
   - Indicator SO5-1: Trends in international bilateral and multilateral official development assistance
   - Indicator SO5-2: Trends in domestic public resources
   - Indicator SO5-3: Trends in number of co-financing partners
   - Indicator SO5-4: Resources mobilized from innovative sources of finance, including from the private sector

II. Implementation framework

A. Financial and non-financial resources

B. Policy and planning

C. Action on the ground
### Strategic objectives

**Strategic objective 1:** To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality.

### SO1-1 Trends in land cover

#### Land cover

##### Quantitative data

National level estimates of the distribution of the main land cover classes (in kilometres squared (km²)).

*Validate default data OR replace them with national data.*

**Default data are derived from the European Space Agency’s Climate Change Initiative Land Cover dataset ([http://www.esa-landcover-cci.org/](http://www.esa-landcover-cci.org/)) [or] Default data are derived from data already reported by the Party within the framework of the Land Degradation Neutrality Target Setting Programme (LDN-TSP) if the Party agreed to use this data for reporting.*

<table>
<thead>
<tr>
<th>Year</th>
<th>Forests</th>
<th>Shrubs, grassland and sparsely vegetated areas</th>
<th>Cropland</th>
<th>Wetlands</th>
<th>Artificial surfaces</th>
<th>Bare land and other areas</th>
</tr>

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Trends in land productivity or functioning of the land

Land productivity dynamics

Quantitative data

National level estimates of land productivity dynamics within each land cover type: area covered by each class of land productivity dynamics (in km²).

Validate default data OR replace them with national data.

Default data are derived from the New World Atlas of Desertification (http://wad.jrc.ec.europa.eu/) and refer to the period 2000-2013 [or] Default data are derived from data already reported by the country in the framework of the Land Degradation Neutrality target setting programme if the Party agreed to using this data for reporting.

<table>
<thead>

<td>(Choose one or more items)</td>
</tr>
</tbody>
</table>

Hotspots/brightspots

Describe where in your country the most significant negative or positive changes in land productivity have taken place.

Complementary information

Provide any complementary information you deem relevant and upload any complementary document into the space provided on the PRAIS portal.
**Strategic objectives**

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

### S01-3 Trends in carbon stocks above and below ground

#### Soil organic carbon stocks

**Quantitative data**

National level estimates of the soil organic carbon (SOC) stocks in topsoil (0–30 cm) within each land cover type (in tonnes per hectare).

Validate default data OR replace them with national data.

*Default data are derived from the SoilGrids system of the International Soil Reference and Information Centre (ISRIC) ([https://www.soilgrids.org/#/?layer=geonode:taxnwrb_250m](https://www.soilgrids.org/#/?layer=geonode:taxnwrb_250m)) [or] Default data are derived from data already reported by the country within the framework of the LDN-TSP if the Party agreed to use this data for reporting.*

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01 Proportion of land that is degraded over total land area (Sustainable Development Goal indicator 15.3.1)

Proportion of land that is degraded

Indicate the total area of land that is degraded (in km²) and the proportion of degraded land relative to the total land area (defined as the total surface area of a country less the area covered by inland waters, like major rivers and lakes), and the year.

<table>
<thead>
<tr>
<th>Total area of degraded land</th>
<th>Proportion of degraded land</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Method

Indicate the methods used to assess the proportion of degraded land:

☐ Remote sensing
☐ Field surveys
☐ Expert knowledge
☐ Other (e.g. participatory assessments, etc.)

Provide the rationale for and an explanation of the methods indicated above.

Click here to enter text.

Level of confidence

Indicate your country’s level of confidence in the assessment of the proportion of land that is degraded:

☐ High (based on comprehensive evidence)
☐ Medium (based on partial evidence)
☐ Low (based on limited evidence)

Describe why the assessment has been given the level of confidence selected above.

### Implementation framework

#### Financial and non-financial resources

Increasing mobilization of financial and non-financial resources for the implementation of the Convention from international and domestic, public and private sources as well as from local communities, including non-traditional funding sources, and climate finance.

<table>
<thead>
<tr>
<th>Increasing mobilization of resources</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Would you like to share an experience on how your country has increased the mobilization of resources?</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>If yes, was this</td>
<td>☐ Financial resources</td>
<td>☐ Non-financial resources</td>
</tr>
</tbody>
</table>

What sources were mobilized?

- ☐ International
- ☐ Domestic
- ☐ Public
- ☐ Private
- ☐ Local communities
- ☐ Non-traditional funding sources
- ☐ Climate finance
- ☐ Other ______________________

Implementing framework
Policy and planning

Establishing policies and enabling environments for promoting and implementing solutions to combat desertification/land degradation and mitigate the effects of drought, including prevention, relief and recovery

Synergies
Would you like to share an experience on how your country institution has established or helped establish policies and enabling environments to promote and/or implement solutions to combat desertification/land degradation and mitigate the effects of drought?

If yes, those policies and enabling environments aimed at:

☐ Promoting solutions to combat DLDD
☐ Implementing solutions to combat DLDD

Is your experience about:

☐ Prevention of the effects of DLDD
☐ Relief efforts after DLDD has caused environmental and/or socioeconomic stress on ecosystems and/or populations
☐ Recovery efforts after DLDD has caused environmental and/or socioeconomic stress on ecosystems and/or populations
☐ Engagement of women in decision-making and implementation, and promotion of their land rights
☐ Other:

Implementation framework
Policy and Planning

Leveraging synergies and integrating DLDD into national plans related to the multilateral environmental agreements (MEAs), in particular the other Rio conventions and other international commitments, as appropriate, within their respective mandates, optimizing efficacy and eliminating duplication of efforts.

Synergies

Would you like to share an experience on how your country has leveraged synergies and integrated DLDD into national plans related to other MEAs, in particular the other Rio conventions and other international commitments?

☐ Yes

☐ No

If yes, the actions have aimed at:

☐ Leveraging DLDD with other national plans related to the other Rio conventions
☐ Integrating DLDD into national plans
☐ Leveraging synergies with other strategies to combat DLDD
☐ Integrating DLDD into other international commitments
☐ Other:

Implementation framework
Policy and Planning

Establishing national policies, measures and governance for drought preparedness and management, including drought contingency plans according to the mandate of the Convention.

Synergies
Would you like to share an experience on how your country established/is establishing national policies, measures and governance for drought preparedness and management, including drought contingency plans?

☐ Yes

☐ No

1. If yes, does your country have a drought contingency plan?

☐ Yes

☐ No

2. If yes, is your country establishing:

☐ National policies for drought preparedness and management

☐ Measures for drought preparedness and management

Narrative
Describe your experience below.
